

Subject: Written statement for Energy Efficiency Advisory Council

Dear Rachel Evans,

I am writing to express my support for an expansion and intensification of the Mass Save energy conservation initiative. I hope very much that program can be beefed up, in part by insisting that stipulated goal attainment be determined by actual measured outcomes rather than estimates. I would also very much like to see an expansion of coverage, with moderate income homes--those with up to 120% median income--receiving full subsidies of all energy saving measures. I am also in favor of more aggressive outreach to low income, non-English speaking households, as well as to households of the disabled and of people of color.

The time is right for Massachusetts to be at the forefront of these crucial climate actions.

Thanks for your consideration--

Christopher Pye
