Key Quotes

Survey format is wanting.

Overall, the consultants do a good job serving the EEAC and its diverse membership. They walk a fine line between proactively anticipating the needs of the Council and not getting too far ahead of their client. I'm pleased with how they walk this line, but they need to make sure their work generally comes from EEAC direction.

While the Consultant team has brought forth new ideas to PA's and their programs, there may be more opportunity to research new strategies or revisit ones that may have new elements.

The individual meetings that Consultant team has with EEAC members is critical and valuable and should be continued. We don't have enough time in EEAC meetings alone for Consultants to have full understanding of the varied interests on the EEAC.
