

Resolution of the Massachusetts Energy Efficiency Advisory Council

Regarding Scoping Study for statewide energy efficiency database and associated budgetary spend

August 22, 2013

The Energy Efficiency Advisory Council (Council) has selected the Energy Platforms LLC to provide consulting services to facilitate the scoping of the Massachusetts statewide energy efficiency database at a cost of \$98,575. The Council looks forward to working with Energy Platforms LLC and commencing the work on the statewide database.

The Council's Database Subcommittee has reviewed and discussed the attached proposal and budget and recommends its approval by the full Council.

The Council's Database Subcommittee reviewed 14 proposals and narrowed the selection down to three firms who were interviewed by the Subcommittee for more information.

The attached proposal from Energy Platforms LLC will work to inform the contractual agreement where the DOER acts as the procurement agent and contract manager on behalf of the Council.

Be it resolved that the Council, having heard the recommendation from the Database Subcommittee approves the selection of Energy Platforms LLC with a budget of \$98,575.
