

Magda Lelek - Bio

Ms. Lelek is a registered mechanical engineer with over 25 years of professional experience on commercial, institutional, and industrial projects. She specializes in building energy modeling, energy efficiency studies, and commissioning services for energy efficiency and LEED projects. Ms. Lelek is a member of ASHRAE. She is also a LEED Accredited Professional and a Certified Energy Manager. She holds a Masters Degree in Mechanical Engineering with a specialty in heating, ventilation, air-conditioning, and environmental sciences. Ms. Lelek is a principal in a consulting firm that offers mechanical engineering services related particularly to energy efficiency, facilities planning, and sustainable building development. Ms. Lelek has been working in support of the utility incentive programs in MA and New England for almost 25 years.

Magda Lelek - Statement

I have been providing engineering consulting services in support of the utility incentive programs in MA and New England for almost 25 years and for the last almost 16 years it has been while working for a small business where I am a partner. I am very knowledgeable about the incentive programs and their evolution over years. Because of this, combined with my engineering and scientific knowledge of energy consuming systems in built environment, I believe I can offer a lot as a member of MA EEAC. I am also very passionate about energy efficiency and sustainability of the natural world that we live in and that inspires my drive for energy conservation.
