

Christine McEachern is running for the EEAC Small Business seat. She has a Bachelor's Degree from Bentley University and is currently an IIC in the Mass Save Program. Christine is co-owner of McEachern Insulation Inc., working together with her husband Patrick. They have been performing weatherization work in Massachusetts for over twenty five years. During this time, their business has operated in numerous low income weatherization programs and has worked in the utility programs for National Grid, Eversource and Columbia Gas.

Christine has extensive knowledge of the Mass Save Program and its scope of operations. She would serve as an excellent resource for the council to gain insight and perspective from a contractor that is actively and successfully operating within the HES program. Christine has always been a strong voice and advocate for Mass Save contractors and is serving her seventh year on the Mass Save Best Practices Working Group, which is an elected position. She works closely alongside the Mass Save Lead Vendors, Program Administrators and other elected IIC's and HPC's to make continuous positive changes to the Mass Save Program to benefit all stakeholders.
