

Able Home Performance, LLC  
401 VFW Drive  
Rockland, Ma 02370

To all Mass Save participating contractors,

My name is Andrew Farinick, I respectfully ask for your careful consideration and for your vote in favor of my candidacy to join the EEAC representing Energy Efficiency Small Businesses.

For those of you who may not know me, I have been an active participant in Mass Save for nearly 10 years as an employee and manager/leader of a small business in the program. My company, Able Home Performance, LLC. is a respected HPC within the Mass Save program and during my employment with Able, I have succeeded to work my way up from the bottom of the ladder to leading our team, gaining experience in every aspect and position that is offered. I started off as the one and only Crew Chief at our company and became the second Home Energy Specialist. While learning the real world challenges of operating in a small HPC and scoping and weatherizing homes I grew into my role as Field Manager, and now Operations Manager. Being hands on and learning each role in the Mass Save program has provided me with an incredible perspective of the positives, challenges, politics, and opportunities for growth and success that small business can and should have in this field and Mass Save.

There is a great amount of value for you and the other members of our community in having a voice like mine representing all small business on the council. Listening to the challenges of others, discussing better ways to attack problems, offering fresh solutions and striving for profitable and positive changes with an in-depth knowledge of the small business perspective is what we need to have on the council representing small business. All of the experience that I have gained over my time in Mass Save gives me a solid and credible platform to speak from and the ability to advocate for us all. I will be a positive and strong voice within the council, actively seeking opportunities to better our position within the program while bringing to light the unique viewpoint of the challenges we smaller companies face, as well as offering valuable new ideas as to how we can thrive and serve the many unique homes of Massachusetts in a way that is best for all parties involved.

Coming from a small business and representing other small businesses, I fully understand the challenges we face daily and am committed to being a voice for all of the other smaller Energy Efficiency Businesses as we all work together moving forward to a carbon neutral Commonwealth. I humbly thank you in advance for your consideration, and for your vote on my behalf.

Sincerely,

Andrew Farinick
