# The American Legion of North Adams (Berkshire)

*The contractor that performed the work was professional and prepared the job using poly film, which kept a normally messy job very neat. They cleaned the areas when the work was completed. We have noticed a big difference. The temperature in the two zones remained steady and the building was noticeably warmer and not drafty.*

*Michael Lewis – American Legion Post 125*

American Legion Post 125, a chapter of the U.S.' largest veteran's service organization, looked to complete a project to increase the comfort of the members while reducing energy costs.

The project included 1800 sqft of 3" closed cell spray foam and thermal paint in an open wall, allowing the members to feel a noticeable difference.

# APPENDIX

# April Data Dashboard (Data Thru Feb) (17% complete)

| Portfolio Metrics | Year Achieved | Percent to Annual Goal |
|---|---|---|
| Spending ($) | $ 130,369,542 | 9% |
