

C&I EM&V

Update

June 14, 2011

EEAC Consultant Team

C&I EM&V Studies- Electric

Studies for inclusion in the 2010 annual reports will be completed by June 15th

Large C&I **electric** NTG study statewide results show an approximate **6% reduction in planned savings.**

The Small CI impact study focused on lighting measures. Study results show **no reduction in statewide planned savings.**

Results of the evaluation will have a mild impact on overall claimed savings for 2010 **electric** energy

C&I EM&V Studies- Gas

C&I *gas* results are based on the research under the Best Available Information approach and show modest NTG adjustments to planned savings. *

Other studies are still underway to inform 2012 MTM planning

*Note that these results will not affect the gas PAs 2010 performance incentive but will be provided as actual program savings in the 2010 annual reports

Overall Assessment

If all results to date were applied to 2012 planning they would not have a significant impact on the 2012 savings goals.
