Dear Chairs-

I fully support the Coalition for CORI Climate Inclusion's advocacy on behalf or Massachusetts residents with CORI's and urge the EEAC to support and formally adopt fair chance hiring practices for all Mass Save program administrators, employees, contractors, and subcontractors.

It is my belief that people who have been incarcerated should have resources and supports available to successfully reintegrate into the community and economy without being penalized via exclusion from opportunities such as jobs and housing. The current policy barrier to employment due to having a CORI is equivalent to justice system involved residents continuing to serve time on a sentence they have completed.

Thank you for your time and consideration regarding my advocacy

Best regards,

Chaz Moon
