Written comments: EEAC meeting May 21, 2025

My very brief and initial comment that I will expand on in oral comments are the following;

My review of the Healey legislation titled Affordability Legislation is that it includes many proposed points and issues but one big question that I have is that it raised the prospect of a new Council on Decarb that overlaps with the EEAC and unless there is a clear set of details and process for the existing EEAC and the new Council to be coordinated and linked together- perhaps just combining them into one then there will be confusion and conflict.
