

Electric & Gas Technical Reference Manuals

Integrated into DOER's PARIS Database

DOER and EEAC Consultants essentially are creating a transparent and updateable statewide Technical Resource Manual in a database format that uses individual Program Administrators'

Tracking=>TRM=>Cost-Effectiveness Screening Systems

Responsibilities

Administrators

- Establish linkages between the labels used in their tracking systems, technical resources documents, and the measure names in their cost-effectiveness screening models
- Submit current data on savings calculations and parameters to DOER and EEAC Consultants - **June 1st.**
- Develop with DOER & EEAC Consultants a timeline for reviewing draft statewide TRM documents
- Incorporate final TRM values in plans

DOER & EEAC Consultants

- Develop statewide TRM with program administrators that is compatible with PARIS database
- Recommend common naming conventions, if appropriate
- Establish a process for updating TRM
- Write auditing queries that validate connections between tracking system records and reported savings from screening model outputs (in time for 2010 reports).
