Dear Committee,

I have been in several different types of jobs in my past from commercial, medical, institutional and universities which I learned and contributed in energy audits and energy conservation programs. My latest contribution at Peabody Essex Museum provided the establishment with the 2022 Mass Save Climate Leader Award. I personally contributed to building management sequence upgrades on our Central Chiller Plant, Air Handlers and upgrading several of the historical homes to efficient on-demand heating systems. I proposed an entire proposal to upgrade all conventional air conditioning system to heat pump options. Another project I completed was a Central Chiller Plant emergency exhaust system and Steam Boiler make up air system. The exhaust system is interlocked with the refrigerant detection system. I have recently become a Mass Save Preferred Contractor for my business along with having the proper connections to assist in my new role at Tri Town School Union as their HVAC Technician.

If I would be privileged enough to be part of the Massachusetts Department of Energy Resources would allow me to apply me knowledge and gain a lot more from the other committee members.

Thank you for this opportunity and I am hoping I can be part of the Energy Efficiency Advisory Council.

Joe DiOrio
