

Mass Save Data (MSD)

www.masssavedata.com

Portfolio Overview. Actual achievement compared to planned for performance indicators (expenditures, annual & lifetime MWh savings, summer kW capacity savings, annual & lifetime therm savings, and benefits) at the portfolio level (residential, low-income & C&I combined) in chart format (can also be viewed as a data table). Updated quarterly.

Sector Overview. Several charts showing actual achievement compared to planned for performance indicators by sector (residential, low-income & C&I). Updated quarterly.

Sales & Savings. Actual and planned savings compared to forecasted sales (value used for development of Plan goals) as a percentage by sector, statewide and by PA. Savings updated annually; forecasted sales not updated.

Performance Details. Data in a table format showing performance indicators at the core initiative level. Updated quarterly.

Monthly Reporting. Statewide performance indicator data by sector. Updated monthly.

Cost to Deliver. PA costs normalized by annual and lifetime savings at the core initiative level. Updated quarterly.

HES Activity. Home Energy Services (HES) core initiative summary statistics. Includes number of home energy assessments (HEA), average number of lighting measures per HEA, unique customers with weatherization installations, and closure rate. Updated quarterly.

GHG Reductions. Adjusted gross and net savings on an annual and lifetime basis converted into CO₂ reductions. CO₂ reductions can be shown in metric tons or short tons. Shows greenhouse gas equivalents such as number of cars removed from the road through gas and electric savings. Updated quarterly.

Measure Details. Measure or electric end-use (C&I) data from the PAs' BCR models aggregated statewide or filtered by PA. Data can be filtered by measure (e.g., LED) and is shown within the measure by core initiative. Includes quantities, incentives, savings data by fuel type and benefits by type. Updated annually with Plan and Term-Year reports. Currently includes 2016-2018 Plan data.

Geographic. Both a map and list view with data by county, town and residential zip code (as well as C&I zip code for Boston, due to size). Incentives, MWh/therm savings, and MWh/therm usage by sector (residential & low-income and C&I). Some town aggregation for privacy. Updated with profile studies (currently includes 2013 data).
