The current background check policies make it difficult and nearly impossible for me to carry out my role in meeting PowerCorps Boston's mission. Many of our trainees have previous involvement with the court system and despite exhibiting exceptional grit, hard work and determination, they are often not able to access quality career opportunities. Opportunities that will make a difference in their lives and in the lives of their families and communities. I urge the EEAC board to support a Fair Chance MassSave Policy to build thriving communities in and for the future
