

Dear Massachusetts Energy Efficiency Advisory Council,

The MassSave program has helped put Massachusetts at the top of the nation in energy efficiency progress. But we must make it more equitable and ensure that it no longer subsidizes new fossil fuel appliances. The new Roadmap climate law requires the MassSave program to directly address emissions reductions in the interest of achieving net zero by 2050 and to equitably deliver energy efficiency and electrification. The draft plan fails these and other requirements. I urge you to exert all available means to ensure that a revised plan is produced that meets the following criteria:

1. The plan must be an energy justice plan, and center equitable delivery of and access to efficiency programs. Adopt the Equity Working Group's recommendations for the program.
2. To meet our State's mandated emissions reductions targets, this program must prioritize equity and electrification over fossil fuel reliance - stop subsidizing new fossil fuel appliances and heating systems now.
3. In order to understand if the plan meets energy justice mandates, it must require transparent reporting of the demographics of residents served by the program. This reporting should include achievable numeric goals to reach those previously underserved by the program, resources to support those goals, and accountability measures for ensuring they are met.

Thank you for your dedication and commitment to climate and energy justice!

Sincerely,

Patricia Ramsey

Dear Massachusetts Energy Efficiency Advisory Council,

The MassSave program has helped put Massachusetts at the top of the nation in energy efficiency progress. But we must make it more equitable and ensure that it no longer subsidizes new fossil fuel appliances. The new Roadmap climate law requires the MassSave program to directly address emissions reductions in the interest of achieving net zero by 2050 and to equitably deliver energy efficiency and electrification. The draft plan fails these and other requirements. I urge you to exert all available means to ensure that a revised plan is produced that meets the following criteria:

1. The plan must be an energy justice plan, and center equitable delivery of and access to efficiency programs. Adopt the Equity Working Group's recommendations for the program.
2. To meet our State's mandated emissions reductions targets, this program must prioritize equity and electrification over fossil fuel reliance - stop subsidizing new fossil fuel appliances and heating systems now.
3. In order to understand if the plan meets energy justice mandates, it must require transparent reporting of the demographics of residents served by the program. This reporting should include achievable numeric goals to reach those previously underserved by the program, resources to support those goals, and accountability measures for ensuring they are met.

Thank you for your dedication and commitment to climate and energy justice!

Sincerely,

Maureen and Kevin Mccarthy

Dear Massachusetts Energy Efficiency Advisory Council,

My key concern is the energy justice part (item 3 above). It is outrageous that while everyone pays to underwrite the program, poor people generally get nothing back in return. That is totally inequitable. The services provided should be in direct proportion to the income the utility receives from that zip code. And there should be reports annually on who has been served by the program. And there should be some kind of penalty if the utility does not meet that goal. (I know they will fight against that, but they spin Mass Save as a great gift from their company to the people without mentioning it's our money that funds it.)

The MassSave program has helped put Massachusetts at the top of the nation in energy efficiency progress. But we must make it more equitable and ensure that it no longer subsidizes new fossil fuel appliances. The new Roadmap climate law requires the MassSave program to directly address emissions reductions in the interest of achieving net zero by 2050 and to equitably deliver energy efficiency and electrification. The draft plan fails these and other requirements. I urge you to exert all available means to ensure that a revised plan is produced that meets the following criteria:

1. The plan must be an energy justice plan, and center equitable delivery of and access to efficiency programs. Adopt the Equity Working Group's recommendations for the program.
2. To meet our State's mandated emissions reductions targets, this program must prioritize equity and electrification over fossil fuel reliance - stop subsidizing new fossil fuel appliances and heating systems now.
3. In order to understand if the plan meets energy justice mandates, it must require transparent reporting of the demographics of residents served by the program. This reporting should include achievable numeric goals to reach those previously underserved by the program, resources to support those goals, and accountability measures for ensuring they are met.

Thank you for your dedication and commitment to climate and energy justice!

Sincerely,

Grace Hall

Dear Massachusetts Energy Efficiency Advisory Council,

The MassSave program has helped put Massachusetts at the top of the nation in energy efficiency progress. But we must make it more equitable and ensure that it no longer subsidizes new fossil fuel appliances. The new Roadmap climate law requires the MassSave program to directly address emissions reductions in the interest of achieving net zero by 2050 and to equitably deliver energy efficiency and electrification. The draft plan fails these and other requirements. I urge you to exert all available means to ensure that a revised plan is produced that meets the following criteria:

1. The plan must be an energy justice plan, and center equitable delivery of and access to efficiency programs. Adopt the Equity Working Group's recommendations for the program.
2. To meet our State's mandated emissions reductions targets, this program must prioritize equity and electrification over fossil fuel reliance - stop subsidizing new fossil fuel appliances and heating systems now.
3. In order to understand if the plan meets energy justice mandates, it must require transparent reporting of the demographics of residents served by the program. This reporting should include achievable numeric goals to reach those previously underserved by the program, resources to support those goals, and accountability measures for ensuring they are met.

Thank you for your dedication and commitment to climate and energy justice!

Sincerely,

Justine Ross

Dear Massachusetts Energy Efficiency Advisory Council,

The MassSave Plan must include the important issues of climate, equity, environment, and health.

The MassSave program has helped put Massachusetts at the top of the nation in energy efficiency progress. But we must make it more equitable and ensure that it no longer subsidizes new fossil fuel appliances. The new Roadmap climate law requires the MassSave program to directly address emissions reductions in the interest of achieving net zero by 2050 and to equitably deliver energy efficiency and electrification. The draft plan fails these and other requirements. I urge you to exert all available means to ensure that a revised plan is produced that meets the following criteria:

1. The plan must be an energy justice plan, and center equitable delivery of and access to efficiency programs. Adopt the Equity Working Group's recommendations for the program.
2. To meet our State's mandated emissions reductions targets, this program must prioritize equity and electrification over fossil fuel reliance - stop subsidizing new fossil fuel appliances and heating systems now.
3. In order to understand if the plan meets energy justice mandates, it must require transparent reporting of the demographics of residents served by the program. Thank you for your dedication and commitment to climate and energy justice!

Sincerely,

Marc Laverdiere

Dear Massachusetts Energy Efficiency Advisory Council,

Mass Save indirectly encourages energy injustice. By using a clearinghouse to deny, stall, and requiring additional multiple forms to discourage participants of getting the rebates they expected. My own experience was very difficult.

Mass Save needs to be fixed.

The MassSave program has helped put Massachusetts at the top of the nation in energy efficiency progress. But we must make it more equitable and ensure that it no longer subsidizes new fossil fuel appliances. The new Roadmap climate law requires the MassSave program to directly address emissions reductions in the interest of achieving net zero by 2050 and to equitably deliver energy efficiency and electrification. The draft plan fails these and other requirements. I urge you to exert all available means to ensure that a revised plan is produced that meets the following criteria:

Thank you for your dedication and commitment to climate and energy justice!

Sincerely,

Francis Hann

Dear Massachusetts Energy Efficiency Advisory Council,

Our reliance on fossil -fuel needs to end ? we cannot continue to operate the way we have in the past. So much damage has been done to our planet and it needs to stop now.

The MassSave program has helped put Massachusetts at the top of the nation in energy efficiency progress. But we must make it more equitable and ensure that it no longer subsidizes new fossil fuel appliances. The new Roadmap climate law requires the MassSave program to directly address emissions reductions in the interest of achieving net zero by 2050 and to equitably deliver energy efficiency and electrification. The draft plan fails these and other requirements. I urge you to exert all available means to ensure that a revised plan is produced that meets the following criteria:

1. The plan must be an energy justice plan, and center equitable delivery of and access to efficiency programs. Adopt the Equity Working Group?s recommendations for the program.
2. To meet our State?s mandated emissions reductions targets, this program must prioritize equity and electrification?over fossil fuel reliance - stop subsidizing new fossil fuel appliances and heating systems now.
3. In order to understand if the plan meets energy justice mandates, it must require transparent reporting of the demographics of residents served by the program. This reporting should include achievable numeric goals to reach those previously underserved by the program, resources to support those goals, and accountability?measures for ensuring they are met.

Thank you for your dedication and commitment to climate and energy justice!

Sincerely,

Joan Dubis

Dear Massachusetts Energy Efficiency Advisory Council,

I have utilized the Mass Save program and enjoy low energy costs and a home that is comfortable in all seasons. I did this by having my house air sealed and insulated as well as purchasing (at no interest) a high performance hydronic boiler and air source hot water heater ! This is something that everyone should have the privilege of accessing- landlords and tenants. I know that low income renters especially suffer greatly from high energy costs in apartments that are cold in the winter and hot in the summer - very energy inefficient! This should be changed- Thank you , Irene Winkelbauer

The MassSave program has helped put Massachusetts at the top of the nation in energy efficiency progress. But we must make it more equitable and ensure that it no longer subsidizes new fossil fuel appliances. The new Roadmap climate law requires the MassSave program to directly address emissions reductions in the interest of achieving net zero by 2050 and to equitably deliver energy efficiency and electrification. The draft plan fails these and other requirements. I urge you to exert all available means to ensure that a revised plan is produced that meets the following criteria:

1. The plan must be an energy justice plan, and center equitable delivery of and access to efficiency programs. Adopt the Equity Working Group's recommendations for the program.
2. To meet our State's mandated emissions reductions targets, this program must prioritize equity and electrification over fossil fuel reliance - stop subsidizing new fossil fuel appliances and heating systems now.
3. In order to understand if the plan meets energy justice mandates, it must require transparent reporting of the demographics of residents served by the program. This reporting should include achievable numeric goals to reach those previously underserved by the program, resources to support those goals, and accountability measures for ensuring they are met.

Thank you for your dedication and commitment to climate and energy justice!

Sincerely,

Nk Acevedo

Dear Massachusetts Energy Efficiency Advisory Council,

The MassSave program has helped put Massachusetts at the top of the nation in energy efficiency progress. But we must make it more equitable and ensure that it no longer subsidizes new fossil fuel appliances. The new Roadmap climate law requires the MassSave program to directly address emissions reductions in the interest of achieving net zero by 2050 and to equitably deliver energy efficiency and electrification. The draft plan fails these and other requirements. I urge you to exert all available means to ensure that a revised plan is produced that meets the following criteria:

1. The plan must be an energy justice plan, and center equitable delivery of and access to efficiency programs. Adopt the Equity Working Group's recommendations for the program.
2. To meet our State's mandated emissions reductions targets, this program must prioritize equity and electrification over fossil fuel reliance - stop subsidizing new fossil fuel appliances and heating systems now.
3. In order to understand if the plan meets energy justice mandates, it must require transparent reporting of the demographics of residents served by the program. This reporting should include achievable numeric goals to reach those previously underserved by the program, resources to support those goals, and accountability measures for ensuring they are met.

Thank you for your dedication and commitment to climate and energy justice!

Sincerely,

Janet Tyndall

Dear Massachusetts Energy Efficiency Advisory Council,

The MassSave program has helped put Massachusetts at the top of the nation in energy efficiency progress. But we must make it more equitable and ensure that it no longer subsidizes new fossil fuel appliances. The new Roadmap climate law requires the MassSave program to directly address emissions reductions in the interest of achieving net zero by 2050 and to equitably deliver energy efficiency and electrification. The draft plan fails these and other requirements. I urge you to exert all available means to ensure that a revised plan is produced that meets the following criteria:

3. In order to understand if the plan meets energy justice mandates, it must require transparent reporting of the demographics of residents served by the program. This reporting should include achievable numeric goals to reach those previously underserved by the program, resources to support those goals, and accountability measures for ensuring they are met.

Thank you for your dedication and commitment to climate and energy justice!

Sincerely,

Jill Silvia

Dear Massachusetts Energy Efficiency Advisory Council,

These standards are very important to me because they start us moving in the needed new direction to truly face up to climate change and to the serious social, political and financial inequities in our systems. Why should the old energy providers be first to draft such plans? Their interests are always going to be to slow needed changes. Why can't proposals from citizen groups start the process? On whose side is our government. It should always be for the people first.

The MassSave program has helped put Massachusetts at the top of the nation in energy efficiency progress. But we must make it more equitable and ensure that it no longer subsidizes new fossil fuel appliances. The new Roadmap climate law requires the MassSave program to directly address emissions reductions in the interest of achieving net zero by 2050 and to equitably deliver energy efficiency and electrification. The draft plan fails these and other requirements. I urge you to exert all available means to ensure that a revised plan is produced that meets the following criteria:

1. The plan must be an energy justice plan, and center equitable delivery of and access to efficiency programs. Adopt the Equity Working Group's recommendations for the program.

Thank you for your dedication and commitment to climate and energy justice!

Sincerely,

Robert Kintz

Dear Massachusetts Energy Efficiency Advisory Council,

The energy grid needs to include an energy justice plan - the renters, the poor, have always been taken advantage of. Everyone knows we must move toward electrification and geothermal. Please follow the science and work toward justice for all.

The MassSave program has helped put Massachusetts at the top of the nation in energy efficiency progress. But we must make it more equitable and ensure that it no longer subsidizes new fossil fuel appliances. The new Roadmap climate law requires the MassSave program to directly address emissions reductions in the interest of achieving net zero by 2050 and to equitably deliver energy efficiency and electrification. The draft plan fails these and other requirements. I urge you to exert all available means to ensure that a revised plan is produced that meets the following criteria:

1. The plan must be an energy justice plan, and center equitable delivery of and access to efficiency programs. Adopt the Equity Working Group's recommendations for the program.
2. To meet our State's mandated emissions reductions targets, this program must prioritize equity and electrification over fossil fuel reliance - stop subsidizing new fossil fuel appliances and heating systems now.
3. In order to understand if the plan meets energy justice mandates, it must require transparent reporting of the demographics of residents served by the program. This reporting should include achievable numeric goals to reach those previously underserved by the program, resources to support those goals, and accountability measures for ensuring they are met.

Thank you for your dedication and commitment to climate and energy justice!

Sincerely,

Dianne Plantamura

Dear Massachusetts Energy Efficiency Advisory Council,

The MassSave program has helped put Massachusetts at the top of the nation in energy efficiency progress. But we must make it more equitable and ensure that it no longer subsidizes new fossil fuel appliances. The new Roadmap climate law requires the MassSave program to directly address emissions reductions in the interest of achieving net zero by 2050 and to equitably deliver energy efficiency and electrification. The draft plan fails these and other requirements. I urge you to exert all available means to ensure that a revised plan is produced that meets the following criteria:

Thank you for your dedication and commitment to climate and energy justice!

Sincerely,

Hannah Gibson

Dear Massachusetts Energy Efficiency Advisory Council,

This is vital at this time! Please pass! Thank you!

The MassSave program has helped put Massachusetts at the top of the nation in energy efficiency progress. But we must make it more equitable and ensure that it no longer subsidizes new fossil fuel appliances. The new Roadmap climate law requires the MassSave program to directly address emissions reductions in the interest of achieving net zero by 2050 and to equitably deliver energy efficiency and electrification. The draft plan fails these and other requirements. I urge you to exert all available means to ensure that a revised plan is produced that meets the following criteria:

1. The plan must be an energy justice plan, and center equitable delivery of and access to efficiency programs. Adopt the Equity Working Group's recommendations for the program.
2. To meet our State's mandated emissions reductions targets, this program must prioritize equity and electrification over fossil fuel reliance - stop subsidizing new fossil fuel appliances and heating systems now.
3. In order to understand if the plan meets energy justice mandates, it must require transparent reporting of the demographics of residents served by the program. This reporting should include achievable numeric goals to reach those previously underserved by the program, resources to support those goals, and accountability measures for ensuring they are met.

Thank you for your dedication and commitment to climate and energy justice!

Sincerely,

Jennifer Hinton

Dear Massachusetts Energy Efficiency Advisory Council,

Thank you for your consideration of these comments. I would also like to include the comments submitted by Mothers Out Front that include additional detail on these points.

Best,

Cora

Equity must be fully centered in every aspect of the MassSave program. Mothers Out Front Massachusetts wishes to support and amplify the equity-focused comments on the Plan jointly submitted by eleven organizations on March 24th, 2021. It is a well-documented fact that MassSave has not equally benefited renters, moderate-income households, and non-English speaking residents, or adequately addressed the barriers to access faced by these groups. The current draft Plan lacks accountability measures and metrics to ensure that equity-focused goals are met. Specifically, the Plan includes no specific budget, participation, or savings metrics for renters and landlords, English-isolated populations, or partnership goals - and only partial information for small business, workforce, and moderate-income customers. Members of the EEAC should not favorably vote on a Plan without equity-centered, specific goals and budgets or a Plan that does not address MassSave's historic failure to reach underserved communities and populations.

The MassSave program must be fully reimagined to meet the urgency of the climate crisis. The depth and tragedy of the climate crisis cannot be answered with the incrementalism reflected in the Plan's approach. By 2050 at the absolute latest, all of Massachusetts' two million buildings must achieve net zero emissions. By 2030, at least half of our buildings must achieve net zero emissions - and MassSave has a critical role in ensuring that happens. Furnaces and boilers are replaced only once every 15 to 30 years. Under this draft Plan, MassSave will continue pouring ratepayer money into new fossil fuel systems long past when they are needed, at the brink of too late. In May 2021, the International Energy Agency (IEA) published a report outlining pathways to net zero emissions by 2050. The IEA report calls for prohibiting the use of fossil fuel appliances in buildings by 2025. Meanwhile, the current Three-Year Plan incentivizes the installation of new fossil fuel equipment straight through 2024. The equitable transformation of our building stock and workforce will be a herculean undertaking requiring innovation, creativity, and the full weight of every MassSave penny and policy. At this moment, the impractical and unrealistic choice is to continue to use ratepayer dollars to incentivize new fossil fuel systems. These incentives must stop.

The MassSave program must align with the Commonwealth's legally binding 2030 and 2050 emissions targets. The current Plan contains no budgets, targets, or data to explain its compliance with Massachusetts plans and law. The Plan, as written, does not align with the 2030 Clean Energy and Climate Plan goals (which themselves were already insufficiently ambitious and not aligned with the recent Next Generation Roadmap legislation). The 2030 Clean Energy and Climate Plan calls for 1,000,000 heat pump retrofits by 2030. The current Three-Year Plan proposes nowhere near the number of heat pumps needed to reach this goal. As noted in CLF's April 2021 comment letter: "the PAs have not explained whether the limited deployment of heat pumps, combined with the continued incentivizing of fossil fuel equipment, will place the Plan in compliance with the GCA, GWSA, and Roadmap Law... the Plan's lack of dedicated budgets, measurable targets, and tracking data also obscures its level of compliance with these statutes."

It is past time to rise to the challenge of this moment. We urge you to put MassSave's funding and efforts towards prioritizing the communities and populations most underserved and at-risk, towards building decarbonization and electrification, towards workforce development creating a diverse labor force with future-ready skills, and towards innovative pilots and programs solving for the immense challenges ahead.

The MassSave program has helped put Massachusetts at the top of the nation in energy efficiency progress. But we must make it more equitable and ensure that it no longer subsidizes new fossil fuel appliances. The new Roadmap climate law requires the MassSave program to directly address emissions reductions in the interest of achieving net zero by 2050 and to equitably deliver energy efficiency and electrification. The draft plan fails these and other requirements. I urge you to exert all available means to ensure that a revised plan is produced that meets the following criteria:

1. The plan must be an energy justice plan, and center equitable delivery of and access to efficiency programs. Adopt the Equity Working Group's recommendations for the program.
2. To meet our State's mandated emissions reductions targets, this program must prioritize equity and electrification over fossil fuel reliance - stop subsidizing new fossil fuel appliances and heating systems now.
3. In order to understand if the plan meets energy justice mandates, it must require transparent reporting of the demographics of residents served by the program. This reporting should include achievable numeric goals to reach those previously underserved by the program, resources to support those goals, and accountability measures for ensuring they are met.

Thank you for your dedication and commitment to climate and energy justice!

Sincerely,

Cora Weissbourd

Dear Massachusetts Energy Efficiency Advisory Council,

The MassSave program has helped put Massachusetts at the top of the nation in energy efficiency progress. But we must make it more equitable and ensure that it no longer subsidizes new fossil fuel appliances. The new Roadmap climate law requires the MassSave program to directly address emissions reductions in the interest of achieving net zero by 2050 and to equitably deliver energy efficiency and electrification. The draft plan fails these and other requirements. I urge you to exert all available means to ensure that a revised plan is produced that meets the following criteria:

1. The plan must be an energy justice plan, and center equitable delivery of and access to efficiency programs. Adopt the Equity Working Group's recommendations for the program.

Alan Gordon

Dear Massachusetts Energy Efficiency Advisory Council,

The MassSave program has helped put Massachusetts at the top of the nation in energy efficiency progress. But we must make it more equitable and ensure that it no longer subsidizes new fossil fuel appliances. The new Roadmap climate law requires the MassSave program to directly address emissions reductions in the interest of achieving net zero by 2050 and to equitably deliver energy efficiency and electrification. The draft plan fails these and other requirements. I urge you to exert all available means to ensure that a revised plan is produced that meets the following criteria:

1. The plan must be an energy justice plan, and center equitable delivery of and access to efficiency programs. Adopt the Equity Working Group's recommendations for the program.
2. To meet our State's mandated emissions reductions targets, this program must prioritize equity and electrification over fossil fuel reliance - stop subsidizing new fossil fuel appliances and heating systems now.
3. In order to understand if the plan meets energy justice mandates, it must require transparent reporting of the demographics of residents served by the program. This reporting should include achievable numeric goals to reach those previously underserved by the program, resources to support those goals, and accountability measures for ensuring they are met.

Thank you for your dedication and commitment to climate and energy justice!

Sincerely,

Harriet Forman

Dear Massachusetts Energy Efficiency Advisory Council,

We are in a climate and justice crisis. To subsidize fossil fuels in any way is insanity. And to not make access to the program available to all, especially those who are typically underserved, is more than just unfair. It also hinders the ability to reduce emissions, by ignoring segments of the population.

The MassSave program has helped put Massachusetts at the top of the nation in energy efficiency progress. But we must make it more equitable and ensure that it no longer subsidizes new fossil fuel appliances. The new Roadmap climate law requires the MassSave program to directly address emissions reductions in the interest of achieving net zero by 2050 and to equitably deliver energy efficiency and electrification. The draft plan fails these and other requirements. I urge you to exert all available means to ensure that a revised plan is produced that meets the following criteria:

1. The plan must be an energy justice plan, and center equitable delivery of and access to efficiency programs. Adopt the Equity Working Group's recommendations for the program.
2. To meet our State's mandated emissions reductions targets, this program must prioritize equity and electrification over fossil fuel reliance - stop subsidizing new fossil fuel appliances and heating systems now.
3. In order to understand if the plan meets energy justice mandates, it must require transparent reporting of the demographics of residents served by the program. This reporting should include achievable numeric goals to reach those previously underserved by the program, resources to support those goals, and accountability measures for ensuring they are met.

Thank you for your dedication and commitment to climate and energy justice!

Sincerely,

Martha Cottle

Dear Massachusetts Energy Efficiency Advisory Council,

The MassSave program has helped put Massachusetts at the top of the nation in energy efficiency progress. But we must make it more equitable and ensure that it no longer subsidizes new fossil fuel appliances. The new Roadmap climate law requires the MassSave program to directly address emissions reductions in the interest of achieving net zero by 2050 and to equitably deliver energy efficiency and electrification. Thomas Matsuda

To Whom It May Concern:

It is important that MassSave initiates a plan that addresses emission reductions and meets requirements for equitable delivery and access to more efficient energy saving programs. Fossil fuels has caused our planet to be in a climate crisis, and it is important to begin to help our planet recover from the damage we have done to it in the name of progress, and to fill the pockets of some and not the benefit of all people. It is time for us to become good stewards of our planet, she has looked out for us and it's time we begin to look out for her. Our planet needs us and we need her, she is the only viable life source for all people and we are taking her for granted. Lets change the way we do business, not only for us, but for future generations.

Thank you for your dedication and commitment to climate and energy justice!

Sincerely,

Karyn Barry

Dear Massachusetts Energy Efficiency Advisory Council,

From my personal observations, MassSAVE has benefitted middle and upperclass folks who are always looking for a financially savvy deal. The "haves" get free and reduced services and products while those trying to keep up with basic living expenses, which are a vastly larger share of their income, are left out - literally- in the cold. We need building energy efficiency standards like those for fire protection or lead paint, mandatory - at least for those getting government housing assistance. As a Letter Carrier, I've seen first hand how my well to do, highly educated patrons quickly adopted MassSave perks such as insulation and mini-split heat pumps. My patrons in rental units keep paying high energy bills, quite often subsidized by the government.

The MassSave program has helped put Massachusetts at the top of the nation in energy efficiency progress. But we must make it more equitable and ensure that it no longer subsidizes new fossil fuel appliances. The new Roadmap climate law requires the MassSave program to directly address emissions reductions in the interest of achieving net zero by 2050 and to equitably deliver energy efficiency and electrification. The draft plan fails these and other requirements. I urge you to exert all available means to ensure that a revised plan is produced that meets the following criteria:

1. The plan must be an energy justice plan, and center equitable delivery of and access to efficiency programs. Adopt the Equity Working Group's recommendations for the program.
2. To meet our State's mandated emissions reductions targets, this program must prioritize equity and electrification over fossil fuel reliance - stop subsidizing new fossil fuel appliances and heating systems now.
3. In order to understand if the plan meets energy justice mandates, it must require transparent reporting of the demographics of residents served by the program. This reporting should include achievable numeric goals to reach those previously underserved by the program, resources to support those goals, and accountability measures for ensuring they are met.

Thank you for your dedication and commitment to climate and energy justice!

1. The plan must be an energy justice plan, and center equitable delivery of and access to efficiency programs. Adopt the Equity Working Group's recommendations for the program.
2. To meet our State's mandated emissions reductions targets, this program must prioritize equity and electrification over fossil fuel reliance - stop subsidizing new fossil fuel appliances and heating systems now.
3. In order to understand if the plan meets energy justice mandates, it must require transparent reporting of the demographics of residents served by the program. This reporting should include achievable numeric goals to reach those previously underserved by the program, resources to support those goals, and accountability measures for ensuring they are met.

Thank you for your dedication and commitment to climate and energy justice!

Sincerely,

Liz Field

Dear Massachusetts Energy Efficiency Advisory Council,

The MassSave program should include everyone in its program. We need the Mass energy efficiency program to be fair and just by including the 3 improvements mentioned in the plan. Please endorse energy justice and follow the EEAC guidelines.

The MassSave program has helped put Massachusetts at the top of the nation in energy efficiency progress. But we must make it more equitable and ensure that it no longer subsidizes new fossil fuel appliances. The new Roadmap climate law requires the MassSave program to directly address emissions reductions in the interest of achieving net zero by 2050 and to equitably deliver energy efficiency and electrification. The draft plan fails these and other requirements. I urge you to exert all available means to ensure that a revised plan is produced that meets the following criteria:

1. The plan must be an energy justice plan, and center equitable delivery of and access to efficiency programs. Adopt the Equity Working Group's recommendations for the program.
2. To meet our State's mandated emissions reductions targets, this program must prioritize equity and electrification over fossil fuel reliance - stop subsidizing new fossil fuel appliances and heating systems now.
3. In order to understand if the plan meets energy justice mandates, it must require transparent reporting of the demographics of residents served by the program. This reporting should include achievable numeric goals to reach those previously underserved by the program, resources to support those goals, and accountability measures for ensuring they are met.

Thank you for your dedication and commitment to climate and energy justice!

Sincerely,

Maureen Curley

Dear Massachusetts Energy Efficiency Advisory Council,

The MassSave program has helped put Massachusetts at the top of the nation in energy efficiency progress. But we must make it more equitable and ensure that it no longer subsidizes new fossil fuel appliances. The new Roadmap climate law requires the MassSave program to directly address emissions reductions in the interest of achieving net zero by 2050 and to equitably deliver energy efficiency and electrification. The draft plan fails these and other requirements. I urge you to exert all available means to ensure that a revised plan is produced that meets the following criteria:

1. The plan must be an energy justice plan, and center equitable delivery of and access to efficiency programs. Adopt the Equity Working Group's recommendations for the program.
2. To meet our State's mandated emissions reductions targets, this program must prioritize equity and electrification over fossil fuel reliance - stop subsidizing new fossil fuel appliances and heating systems now.
3. In order to understand if the plan meets energy justice mandates, it must require transparent reporting of the demographics of residents served by the program. This reporting should include achievable numeric goals to reach those previously underserved by the program, resources to support those goals, and accountability measures for ensuring they are met.

Thank you for your dedication and commitment to climate and energy justice!

Sincerely,

Ruth Flaherty

Dear Massachusetts Energy Efficiency Advisory Council,

The MassSave program has helped put Massachusetts at the top of the nation in energy efficiency progress. But we must make it more equitable and ensure that it no longer subsidizes new fossil fuel appliances. The new Roadmap climate law requires the MassSave program to directly address emissions reductions in the interest of achieving net zero by 2050 and to equitably deliver energy efficiency and electrification. The draft plan fails these and other requirements. I urge you to exert all available means to ensure that a revised plan is produced that meets the following criteria:

1. The plan must be an energy justice plan, and center equitable delivery of and access to efficiency programs. Adopt the Equity Working Group's recommendations for the program.
2. To meet our State's mandated emissions reductions targets, this program must prioritize equity and electrification over fossil fuel reliance - stop subsidizing new fossil fuel appliances and heating systems now.
3. In order to understand if the plan meets energy justice mandates, it must require transparent reporting of the demographics of residents served by the program. This reporting should include achievable numeric goals to reach those previously underserved by the program, resources to support those goals, and accountability measures for ensuring they are met.

Thank you for your dedication and commitment to climate and energy justice!

Sincerely,

Paul Paquin

Dear Massachusetts Energy Efficiency Advisory Council,

The MassSave program has helped put Massachusetts at the top of the nation in energy efficiency progress. But we must make it more equitable and ensure that it no longer subsidizes new fossil fuel appliances. The new Roadmap climate law requires the MassSave program to directly address emissions reductions in the interest of achieving net zero by 2050 and to equitably deliver energy efficiency and electrification. The draft plan fails these and other requirements. I urge you to exert all available means to ensure that a revised plan is produced that meets the following criteria:

1. The plan must be an energy justice plan, and center equitable delivery of and access to efficiency programs. Adopt the Equity Working Group's recommendations for the program.
2. To meet our State's mandated emissions reductions targets, this program must prioritize equity and electrification over fossil fuel reliance - stop subsidizing new fossil fuel appliances and heating systems now.
3. In order to understand if the plan meets energy justice mandates, it must require transparent reporting of the demographics of residents served by the program. This reporting should include achievable numeric goals to reach those previously underserved by the program, resources to support those goals, and accountability measures for ensuring they are met.

Thank you for your dedication and commitment to climate and energy justice!

Sincerely,

Resa Blatman

Dear Massachusetts Energy Efficiency Advisory Council,

The plan must reflect the latest climate legislation that was enacted this year

The MassSave program has helped put Massachusetts at the top of the nation in energy efficiency progress. But we must make it more equitable and ensure that it no longer subsidizes new fossil fuel appliances. The new Roadmap climate law requires the MassSave program to directly address emissions reductions in the interest of achieving net zero by 2050 and to equitably deliver energy efficiency and electrification. The draft plan fails these and other requirements. I urge you to exert all available means to ensure that a revised plan is produced that meets the following criteria:

1. The plan must be an energy justice plan, and center equitable delivery of and access to efficiency programs. Adopt the Equity Working Group's recommendations for the program.
2. To meet our State's mandated emissions reductions targets, this program must prioritize equity and electrification over fossil fuel reliance - stop subsidizing new fossil fuel appliances and heating systems now.
3. In order to understand if the plan meets energy justice mandates, it must require transparent reporting of the demographics of residents served by the program. This reporting should include achievable numeric goals to reach those previously underserved by the program, resources to support those goals, and accountability measures for ensuring they are met.

Thank you for your dedication and commitment to climate and energy justice!

Sincerely,

Al Blake

Dear Massachusetts Energy Efficiency Advisory Council,

The MassSave program has helped put Massachusetts at the top of the nation in energy efficiency progress. But we must make it more equitable and ensure that it no longer subsidizes new fossil fuel appliances. The new Roadmap climate law requires the MassSave program to directly address emissions reductions in the interest of achieving net zero by 2050 and to equitably deliver energy efficiency and electrification. The draft plan fails these and other requirements. I urge you to exert all available means to ensure that a revised plan is produced that meets the following criteria:

1. The plan must be an energy justice plan, and center equitable delivery of and access to efficiency programs. Adopt the Equity Working Group's recommendations for the program.
2. To meet our State's mandated emissions reductions targets, this program must prioritize equity and electrification over fossil fuel reliance - stop subsidizing new fossil fuel appliances and heating systems now.
3. In order to understand if the plan meets energy justice mandates, it must require transparent reporting of the demographics of residents served by the program. This reporting should include achievable numeric goals to reach those previously underserved by the program, resources to support those goals, and accountability measures for ensuring they are met.

Thank you for your dedication and commitment to climate and energy justice!

Sincerely,

Sarah Stewart

Dear Massachusetts Energy Efficiency Advisory Council,

It would make a lot of sense to encourage the installation of ASHPs or GSHPs instead of replacing fossil fuel furnaces that will last another 20-30 years at a time that we need to get off of fossil fuels. Moreover, homeowners could be encouraged to make the switch if there were MassSave financial incentives that could be based on the owner's income.

The MassSave program has helped put Massachusetts at the top of the nation in energy efficiency progress. But we must make it more equitable and ensure that it no longer subsidizes new fossil fuel appliances. The new Roadmap climate law requires the MassSave program to directly address emissions reductions in the interest of achieving net zero by 2050 and to equitably deliver energy efficiency and electrification. The draft plan fails these and other requirements. I urge you to exert all available means to ensure that a revised plan is produced that meets the following criteria:

1. The plan must be an energy justice plan, and center equitable delivery of and access to efficiency programs. Adopt the Equity Working Group's recommendations for the program.
2. To meet our State's mandated emissions reductions targets, this program must prioritize equity and electrification over fossil fuel reliance - stop subsidizing new fossil fuel appliances and heating systems now.
3. In order to understand if the plan meets energy justice mandates, it must require transparent reporting of the demographics of residents served by the program. This reporting should include achievable numeric goals to reach those previously underserved by the program, resources to support those goals, and accountability measures for ensuring they are met.

Thank you for your dedication and commitment to climate and energy justice!

Sincerely,

Michael McCord

Dear Massachusetts Energy Efficiency Advisory Council,

The MassSave program has helped put Massachusetts at the top of the nation in energy efficiency progress. But we must make it more equitable and ensure that it no longer subsidizes new fossil fuel appliances. The new Roadmap climate law requires the MassSave program to directly address emissions reductions in the interest of achieving net zero by 2050 and to equitably deliver energy efficiency and electrification. 3. In order to understand if the plan meets energy justice mandates, it must require transparent reporting of the demographics of residents served by the program. This reporting should include achievable numeric goals to reach those previously underserved by the program, resources to support those goals, and accountability measures for ensuring they are met.

Thank you for your dedication and commitment to climate and energy justice!

Sincerely,

Jane Winn

Dear Massachusetts Energy Efficiency Advisory Council,

There is not a moment to lose. We must move forcefully in the direction of replacing fossil fuels with renewables RIGHT NOW if we are to have any hope for a recognizable planet in the near future. Please act now.

The MassSave program has helped put Massachusetts at the top of the nation in energy efficiency progress. But we must make it more equitable and ensure that it no longer subsidizes new fossil fuel appliances. The new Roadmap climate law requires the MassSave program to directly address emissions reductions in the interest of achieving net zero by 2050 and to equitably deliver energy efficiency and electrification. The draft plan fails these and other requirements. I urge you to exert all available means to ensure that a revised plan is produced that meets the following criteria:

1. The plan must be an energy justice plan, and center equitable delivery of and access to efficiency programs. Adopt the Equity Working Group's recommendations for the program.
2. To meet our State's mandated emissions reductions targets, this program must prioritize equity and electrification over fossil fuel reliance - stop subsidizing new fossil fuel appliances and heating systems now.
3. In order to understand if the plan meets energy justice mandates, it must require transparent reporting of the demographics of residents served by the program. This reporting should include achievable numeric goals to reach those previously underserved by the program, resources to support those goals, and accountability measures for ensuring they are met.

Thank you for your dedication and commitment to climate and energy justice!

Sincerely,

Sierra Bright

Dear Massachusetts Energy Efficiency Advisory Council,

I recently got a MassSave rebate for a high efficiency gas fueled boiler. MassSave must not offer any more rebates on any fossil fueled system or appliance.

The MassSave program has helped put Massachusetts at the top of the nation in energy efficiency progress. But we must make it more equitable and ensure that it no longer subsidizes new fossil fuel appliances. The new Roadmap climate law requires the MassSave program to directly address emissions reductions in the interest of achieving net zero by 2050 and to equitably deliver energy efficiency and electrification. The draft plan fails these and other requirements. I urge you to exert all available means to ensure that a revised plan is produced that meets the following criteria:

1. The plan must be an energy justice plan, and center equitable delivery of and access to efficiency programs. Adopt the Equity Working Group's recommendations for the program.
2. To meet our State's mandated emissions reductions targets, this program must prioritize equity and electrification over fossil fuel reliance - stop subsidizing new fossil fuel appliances and heating systems now.
3. In order to understand if the plan meets energy justice mandates, it must require transparent reporting of the demographics of residents served by the program. This reporting should include achievable numeric goals to reach those previously underserved by the program, resources to support those goals, and accountability measures for ensuring they are met.

Thank you for your dedication and commitment to climate and energy justice!

Sincerely,

Gretchen Dietz

Dear Massachusetts Energy Efficiency Advisory Council,

The MassSave program has helped put Massachusetts at the top of the nation in energy efficiency progress. But we must make it more equitable and ensure that it no longer subsidizes new fossil fuel appliances. The new Roadmap climate law requires the MassSave program to directly address emissions reductions in the interest of achieving net zero by 2050 and to equitably deliver energy efficiency and electrification. The draft plan fails these and other requirements. I urge you to exert all available means to ensure that a revised plan is produced that meets the following criteria:

1. The plan must be an energy justice plan, and center equitable delivery of and access to efficiency programs. Adopt the Equity Working Group's recommendations for the program.
2. To meet our State's mandated emissions reductions targets, this program must prioritize equity and electrification over fossil fuel reliance - stop subsidizing new fossil fuel appliances and heating systems now.
3. In order to understand if the plan meets energy justice mandates, it must require transparent reporting of the demographics of residents served by the program. This reporting should include achievable numeric goals to reach those previously underserved by the program, resources to support those goals, and accountability measures for ensuring they are met.

Thank you for your dedication and commitment to climate and energy justice!

Sincerely,

Glenn Billingsley

Dear Massachusetts Energy Efficiency Advisory Council,

I would also like to see how the municipal light plants in our state will be working towards the same goals, in line with the MassSave program. Currently they are woefully behind the Investor-Owned Utilities in terms of energy efficiency incentives. We will never meet our Roadmap goals if we don't include the MLP towns in our plans.

The MassSave program has helped put Massachusetts at the top of the nation in energy efficiency progress. But we must make it more equitable and ensure that it no longer subsidizes new fossil fuel appliances. The new Roadmap climate law requires the MassSave program to directly address emissions reductions in the interest of achieving net zero by 2050 and to equitably deliver energy efficiency and electrification. The draft plan fails these and other requirements. I urge you to exert all available means to ensure that a revised plan is produced that meets the following criteria:

1. The plan must be an energy justice plan, and center equitable delivery of and access to efficiency programs. Adopt the Equity Working Group's recommendations for the program.
2. To meet our State's mandated emissions reductions targets, this program must prioritize equity and electrification over fossil fuel reliance - stop subsidizing new fossil fuel appliances and heating systems now.
3. In order to understand if the plan meets energy justice mandates, it must require transparent reporting of the demographics of residents served by the program. This reporting should include achievable numeric goals to reach those previously underserved by the program, resources to support those goals, and accountability measures for ensuring they are met.

Thank you for your dedication and commitment to climate and energy justice!

Sincerely,

Mary Gard

Dear Massachusetts Energy Efficiency Advisory Council,

As a Pastor in the North Quabbin area of MA, I am aware that financial inequities are a factor in choices people make to convert to environmentally sustainable energy sources and energy usage. This is a factor in our area which is a uniformly white population. I have an understanding of how poverty and race amplify the disincentives for urban populations to seek to change their energy usage. We need to increase opportunities and incentives for rural and urban poor, and especially BIPOC communities, to opt into new, renewable and sustainable energy sources if we are to dampen the destructive power of climate change.

Climate and energy equity are financial and moral issues that can't be separated.

The MassSave program has helped put Massachusetts at the top of the nation in energy efficiency progress. But we must make it more equitable and ensure that it no longer subsidizes new fossil fuel appliances. The new Roadmap climate law requires the MassSave program to directly address emissions reductions in the interest of achieving net zero by 2050 and to equitably deliver energy efficiency and electrification. The draft plan fails these and other requirements. I urge you to exert all available means to ensure that a revised plan is produced that meets the following criteria:

1. The plan must be an energy justice plan, and center equitable delivery of and access to efficiency programs. Adopt the Equity Working Group's recommendations for the program.
2. To meet our State's mandated emissions reductions targets, this program must prioritize equity and electrification over fossil fuel reliance - stop subsidizing new fossil fuel appliances and heating systems now.
3. In order to understand if the plan meets energy justice mandates, it must require transparent reporting of the demographics of residents served by the program. This reporting should include achievable numeric goals to reach those previously underserved by the program, resources to support those goals, and accountability measures for ensuring they are met.

Thank you for your dedication and commitment to climate and energy justice!

Sincerely,

Daniel Dibble

Dear Massachusetts Energy Efficiency Advisory Council,

The MassSave program has helped put Massachusetts at the top of the nation in energy efficiency progress. But we must make it more equitable and ensure that it no longer subsidizes new fossil fuel appliances. Thank you for your dedication and commitment to climate and energy justice!

Sincerely,

Marvin Ward

Dear Massachusetts Energy Efficiency Advisory Council,

All the UN reports say we're in a crisis situation already with climate catastrophes already occurring around the world. Last week here in Massachusetts, we broke two temperature records - one for heat and one for cold! The MassSave program must not be watered down to protect the interests of lobbyists for fossil fuels, construction, and other climate change obstructionists! And strong climate justice provisions must be established. Now is the time to make the future safe for future generations!

The MassSave program has helped put Massachusetts at the top of the nation in energy efficiency progress. But we must make it more equitable and ensure that it no longer subsidizes new fossil fuel appliances. The new Roadmap climate law requires the MassSave program to directly address emissions reductions in the interest of achieving net zero by 2050 and to equitably deliver energy efficiency and electrification. The draft plan fails these and other requirements. I urge you to exert all available means to ensure that a revised plan is produced that meets the following criteria:

1. The plan must be an energy justice plan, and center equitable delivery of and access to efficiency programs. Adopt the Equity Working Group's recommendations for the program.
2. To meet our State's mandated emissions reductions targets, this program must prioritize equity and electrification over fossil fuel reliance - stop subsidizing new fossil fuel appliances and heating systems now.
3. In order to understand if the plan meets energy justice mandates, it must require transparent reporting of the demographics of residents served by the program. This reporting should include achievable numeric goals to reach those previously underserved by the program, resources to support those goals, and accountability measures for ensuring they are met.

Thank you for your dedication and commitment to climate and energy justice!

Thank you for your dedication and commitment to climate and energy justice!

Sincerely,

Anne Fisher

Dear Massachusetts Energy Efficiency Advisory Council,

I want my future children and grandchildren to be able to see the seasons change; to go outside without having to wear air-pollution masks; to walk outside in October and see a Massachusetts fall. And I want your children and grandchildren to be able to do the same. I love where I live more than I can properly say--and if keeping it healthy means we have to use more electricity than fossil fuels, I say that's a worthy trade.

The MassSave program has helped put Massachusetts at the top of the nation in energy efficiency progress. But we must make it more equitable and ensure that it no longer subsidizes new fossil fuel appliances. The new Roadmap climate law requires the MassSave program to directly address emissions reductions in the interest of achieving net zero by 2050 and to equitably deliver energy efficiency and electrification. The draft plan fails these and other requirements. I urge you to exert all available means to ensure that a revised plan is produced that meets the following criteria:

1. The plan must be an energy justice plan, and center equitable delivery of and access to efficiency programs. Adopt the Equity Working Group's recommendations for the program.
2. To meet our State's mandated emissions reductions targets, this program must prioritize equity and electrification over fossil fuel reliance - stop subsidizing new fossil fuel appliances and heating systems now.
3. In order to understand if the plan meets energy justice mandates, it must require transparent reporting of the demographics of residents served by the program. This reporting should include achievable numeric goals to reach those previously underserved by the program, resources to support those goals, and accountability measures for ensuring they are met.

Thank you for your dedication and commitment to climate and energy justice!

Sincerely,

Cassidy Pawul

Dear Massachusetts Energy Efficiency Advisory Council,

The MassSave program has helped put Massachusetts at the top of the nation in energy efficiency progress. But we must make it more equitable and ensure that it no longer subsidizes new fossil fuel appliances. The new Roadmap climate law requires the MassSave program to directly address emissions reductions in the interest of achieving net zero by 2050 and to equitably deliver energy efficiency and electrification. The draft plan fails these and other requirements. I urge you to exert all available means to ensure that a revised plan is produced that meets the following criteria:

2. To meet our State's mandated emissions reductions targets, this program must prioritize equity and electrification over fossil fuel reliance - stop subsidizing new fossil fuel appliances and heating systems now.
3. In order to understand if the plan meets energy justice mandates, it must require transparent reporting of the demographics of residents served by the program. This reporting should include achievable numeric goals to reach those previously underserved by the program, resources to support those goals, and accountability measures for ensuring they are met.

Thank you for your dedication and commitment to climate and energy justice!

Sincerely,

Marjorie Smith

Dear Massachusetts Energy Efficiency Advisory Council,

Stopping the continued investment in fossil fuel infrastructure is critical to meeting the climate emergency we face and achieving the energy goals we have set forth. These legacy assets will be in place for decades, further exacerbating the climate emergency and so we need to ensure they are not subsidized in any way by these programs. Instead incentives should be directed to highly efficient heat-pump technology and customers should be encouraged and supported in transitioning to a cleaner and more efficient option rather than merely upgrading their fossil fuel based equipment.

The MassSave program has helped put Massachusetts at the top of the nation in energy efficiency progress. But we must make it more equitable and ensure that it no longer subsidizes new fossil fuel appliances. The new Roadmap climate law requires the MassSave program to directly address emissions reductions in the interest of achieving net zero by 2050 and to equitably deliver energy efficiency and electrification. The draft plan fails these and other requirements. I urge you to exert all available means to ensure that a revised plan is produced that meets the following criteria:

1. The plan must be an energy justice plan, and center equitable delivery of and access to efficiency programs. Adopt the Equity Working Group's recommendations for the program.
2. To meet our State's mandated emissions reductions targets, this program must prioritize equity and electrification over fossil fuel reliance - stop subsidizing new fossil fuel appliances and heating systems now.
3. In order to understand if the plan meets energy justice mandates, it must require transparent reporting of the demographics of residents served by the program. This reporting should include achievable numeric goals to reach those previously underserved by the program, resources to support those goals, and accountability measures for ensuring they are met.

Thank you for your dedication and commitment to climate and energy justice!

Sincerely,

Nathan Cleveland

Mass Save a good start, now improve it

The MassSave program has helped put Massachusetts at the top of the nation in energy efficiency progress. But we must make it more equitable and ensure that it no longer subsidizes new fossil fuel appliances. The new Roadmap climate law requires the MassSave program to directly address emissions reductions in the interest of achieving net zero by 2050 and to equitably deliver energy efficiency and electrification. The draft plan fails these and other requirements. I urge you to exert all available means to ensure that a revised plan is produced that meets the following criteria:

1. The plan must be an energy justice plan, and center equitable delivery of and access to efficiency programs. Adopt the Equity Working Group's recommendations for the program.
2. To meet our State's mandated emissions reductions targets, this program must prioritize equity and electrification over fossil fuel reliance - stop subsidizing new fossil fuel appliances and heating systems now.
3. In order to understand if the plan meets energy justice mandates, it must require transparent reporting of the demographics of residents served by the program. This reporting should include achievable numeric goals to reach those previously underserved by the program, resources to support those goals, and accountability measures for ensuring they are met.

Thank you for your dedication and commitment to climate and energy justice!

Sincerely,

Eugene Brusin

Dear Massachusetts Energy Efficiency Advisory Council,

The importance of this issue cannot be overstated! The people of the world don't want to choke to death.

The MassSave program has helped put Massachusetts at the top of the nation in energy efficiency progress. But we must make it more equitable and ensure that it no longer subsidizes new fossil fuel appliances. The new Roadmap climate law requires the MassSave program to directly address emissions reductions in the interest of achieving net zero by 2050 and to equitably deliver energy efficiency and electrification. The draft plan fails these and other requirements. I urge you to exert all available means to ensure that a revised plan is produced that meets the following criteria:

1. The plan must be an energy justice plan, and center equitable delivery of and access to efficiency programs. Adopt the Equity Working Group's recommendations for the program.
2. To meet our State's mandated emissions reductions targets, this program must prioritize equity and electrification over fossil fuel reliance - stop subsidizing new fossil fuel appliances and heating systems now.
3. In order to understand if the plan meets energy justice mandates, it must require transparent reporting of the demographics of residents served by the program. This reporting should include achievable numeric goals to reach those previously underserved by the program, resources to support those goals, and accountability measures for ensuring they are met.

Thank you for your dedication and commitment to climate and energy justice!

Sincerely,

Arthur Wight

Dear Massachusetts Energy Efficiency Advisory Council,

The MassSave program has helped put Massachusetts at the top of the nation in energy efficiency progress. But we must make it more equitable and ensure that it no longer subsidizes new fossil fuel appliances. The new Roadmap climate law requires the MassSave program to directly address emissions reductions in the interest of achieving net zero by 2050 and to equitably deliver energy efficiency and electrification. The draft plan fails these and other requirements. I urge you to exert all available means to ensure that a revised plan is produced that meets the following criteria:

1. The plan must be an energy justice plan, and center equitable delivery of and access to efficiency programs. Adopt the Equity Working Group's recommendations for the program.

Thank you for your dedication and commitment to climate and energy justice!

Sincerely,

Carole Smudin

Dear Massachusetts Energy Efficiency Advisory Council,

The proposed gas-and-oil fired peaker plant in Peabody has alerted me that it not just this individual project's impact but historic environmental pollution. Areas of long industrial development like Peabody and Danvers (where the new plant would sit) need a cumulative impact analysis, including a CHIA (Comprehensive Health Impact Assessment), since the proposed project is six years old.

The MassSave program has helped put Massachusetts at the top of the nation in energy efficiency progress. But we must make it more equitable and ensure that it no longer subsidizes new fossil fuel appliances. The new Roadmap climate law requires the MassSave program to directly address emissions reductions in the interest of achieving net zero by 2050 and to equitably deliver energy efficiency and electrification. The draft plan fails these and other requirements. I urge you to exert all available means to ensure that a revised plan is produced that meets the following criteria:

1. The plan must be an energy justice plan, and center equitable delivery of and access to efficiency programs. Adopt the Equity Working Group's recommendations for the program.

3. In order to understand if the plan meets energy justice mandates, it must require transparent reporting of the demographics of residents served by the program. This reporting should include achievable numeric goals to reach those previously underserved by the program, resources to support those goals, and accountability measures for ensuring they are met.

Thank you for your dedication and commitment to climate and energy justice!

Sincerely,

Maria Bartlett

Dear Massachusetts Energy Efficiency Advisory Council,

The next 3 years are crucial for MA to lead the decarbonization transition and meet state GHG emissions reduction targets. We cannot let utilities continue to benefit from fossil fuels, and we need to do what we can to ensure that they invest in renewable energy. I hope you will use this opportunity to stand up for our communities and the future of our planet.

The MassSave program has helped put Massachusetts at the top of the nation in energy efficiency progress. But we must make it more equitable and ensure that it no longer subsidizes new fossil fuel appliances. The new Roadmap climate law requires the MassSave program to directly address emissions reductions in the interest of achieving net zero by 2050 and to equitably deliver energy efficiency and electrification. The draft plan fails these and other requirements. I urge you to exert all available means to ensure that a revised plan is produced that meets the following criteria:

1. The plan must be an energy justice plan, and center equitable delivery of and access to efficiency programs. Adopt the Equity Working Group's recommendations for the program.
2. To meet our State's mandated emissions reductions targets, this program must prioritize equity and electrification over fossil fuel reliance - stop subsidizing new fossil fuel appliances and heating systems now.
3. In order to understand if the plan meets energy justice mandates, it must require transparent reporting of the demographics of residents served by the program. This reporting should include achievable numeric goals to reach those previously underserved by the program, resources to support those goals, and accountability measures for ensuring they are met.

Thank you for your dedication and commitment to climate and energy justice!

Sincerely,

Justine Huang

Dear Massachusetts Energy Efficiency Advisory Council,

The MassSave program has helped put Massachusetts at the top of the nation in energy efficiency progress. But we must make it more equitable and ensure that it no longer subsidizes new fossil fuel appliances. The new Roadmap climate law requires the MassSave program to directly address emissions reductions in the interest of achieving net zero by 2050 and to equitably deliver energy efficiency and electrification. The draft plan fails these and other requirements. I urge you to exert all available means to ensure that a revised plan is produced that meets the following criteria:

1. The plan must be an energy justice plan, and center equitable delivery of and access to efficiency programs. Adopt the Equity Working Group's recommendations for the program.

Thank you for your dedication and commitment to climate and energy justice!

Sincerely,

Elizabeth Billingham

Dear Massachusetts Energy Efficiency Advisory Council,

Every action shall not destroy nature-put solar on rooftops and abandoned already destroyed places. Facilitate local energy collection and redistribution vs the problematic grid system vulnerable to failures. (Powerline infrastructure destroys nature as well). Grow food and trees on land for mankind's basic needs of air food and water. This is justice that serves everyone equally.

The MassSave program has helped put Massachusetts at the top of the nation in energy efficiency progress. But we must make it more equitable and ensure that it no longer subsidizes new fossil fuel appliances. The new Roadmap climate law requires the MassSave program to directly address emissions reductions in the interest of achieving net zero by 2050 and to equitably deliver energy efficiency and electrification. The draft plan fails these and other requirements. I urge you to exert all available means to ensure that a revised plan is produced that meets the following criteria:

1. The plan must be an energy justice plan, and center equitable delivery of and access to efficiency programs. Adopt the Equity Working Group's recommendations for the program.

This reporting should include achievable numeric goals to reach those previously underserved by the program, resources to support those goals, and accountability measures for ensuring they are met.

Thank you for your dedication and commitment to climate and energy justice!

Sincerely,

Kenneth Reeves

Dear Massachusetts Energy Efficiency Advisory Council,

MassSave must give more support to heat pumps and less to efficient gas and none to traditional A/C to speed the transition to electric heating and cooling. Recently extreme extremes in weather and new records broken by large margins show that the transition is more urgent than we thought! We are in a race against time, and MassSave has a unique opportunity to make the transition happen for every income level.

The MassSave program has helped put Massachusetts at the top of the nation in energy efficiency progress. But we must make it more equitable and ensure that it no longer subsidizes new fossil fuel appliances. The new Roadmap climate law requires the MassSave program to directly address emissions reductions in the interest of achieving net zero by 2050 and to equitably deliver energy efficiency and electrification. The draft plan fails these and other requirements. I urge you to exert all available means to ensure that a revised plan is produced that meets the following criteria:

1. The plan must be an energy justice plan, and center equitable delivery of and access to efficiency programs. Adopt the Equity Working Group's recommendations for the program.
2. To meet our State's mandated emissions reductions targets, this program must prioritize equity and electrification over fossil fuel reliance - stop subsidizing new fossil fuel appliances and heating systems now.
3. In order to understand if the plan meets energy justice mandates, it must require transparent reporting of the demographics of residents served by the program. This reporting should include achievable numeric goals to reach those previously underserved by the program, resources to support those goals, and accountability measures for ensuring they are met.

Thank you for your dedication and commitment to climate and energy justice!

Sincerely,

Hildrun Passas

Dear Massachusetts Energy Efficiency Advisory Council,

The MassSave program has helped put Massachusetts at the top of the nation in energy efficiency progress. But we must make it more equitable and ensure that it no longer subsidizes new fossil fuel appliances. The new Roadmap climate law requires the MassSave program to directly address emissions reductions in the interest of achieving net zero by 2050 and to equitably deliver energy efficiency and electrification. The draft plan fails these and other requirements. I urge you to exert all available means to ensure that a revised plan is produced that meets the following criteria:

1. The plan must be an energy justice plan, and center equitable delivery of and access to efficiency programs. Adopt the Equity Working Group's recommendations for the program.
2. To meet our State's mandated emissions reductions targets, this program must prioritize equity and electrification over fossil fuel reliance - stop subsidizing new fossil fuel appliances and heating systems now.
3. In order to understand if the plan meets energy justice mandates, it must require transparent reporting of the demographics of residents served by the program. This reporting should include achievable numeric goals to reach those previously underserved by the program, resources to support those goals, and accountability measures for ensuring they are met.

Thank you for your dedication and commitment to climate and energy justice!

Sincerely,

Nancy Brooks

Dear Massachusetts Energy Efficiency Advisory Council,

The MassSave program has helped put Massachusetts at the top of the nation in energy efficiency progress. But we must make it more equitable and ensure that it no longer subsidizes new fossil fuel appliances. The new Roadmap climate law requires the MassSave program to directly address emissions reductions in the interest of achieving net zero by 2050 and to equitably deliver energy efficiency and electrification. The draft plan fails these and other requirements. I urge you to exert all available means to ensure that a revised plan is produced that meets the following criteria:

1. The plan must be an energy justice plan, and center equitable delivery of and access to efficiency programs. Adopt the Equity Working Group's recommendations for the program.
2. To meet our State's mandated emissions reductions targets, this program must prioritize equity and electrification over fossil fuel reliance - stop subsidizing new fossil fuel appliances and heating systems now.
3. In order to understand if the plan meets energy justice mandates, it must require transparent reporting of the demographics of residents served by the program. This reporting should include achievable numeric goals to reach those previously underserved by the program, resources to support those goals, and accountability measures for ensuring they are met.

Thank you for your dedication and commitment to climate and energy justice!

Thank you for your dedication and commitment to climate and energy justice!

Sincerely,

Hewon Hwang

Dear Massachusetts Energy Efficiency Advisory Council,

I have found Mass Save to be an excellent program but it would be better if we could use it to push further on our goals to clean energy and also ensure Renters can gain advantage of the program as I have seen apartments my family members have rented that could help cut consumption.

The MassSave program has helped put Massachusetts at the top of the nation in energy efficiency progress. But we must make it more equitable and ensure that it no longer subsidizes new fossil fuel appliances. The new Roadmap climate law requires the MassSave program to directly address emissions reductions in the interest of achieving net zero by 2050 and to equitably deliver energy efficiency and electrification. The draft plan fails these and other requirements. I urge you to exert all available means to ensure that a revised plan is produced that meets the following criteria:

1. The plan must be an energy justice plan, and center equitable delivery of and access to efficiency programs. Adopt the Equity Working Group's recommendations for the program.

Thank you for your dedication and commitment to climate and energy justice!

Sincerely,

Andrew Lenz

Dear Massachusetts Energy Efficiency Advisory Council,

It was clear after the 2018 Merrimack Valley gas explosions that the Mass Save program was not working for the people of Lawrence, most of whom rent. It is important that Mass Save address this inequity so that people with low incomes can benefit from energy efficiency measures

The MassSave program has helped put Massachusetts at the top of the nation in energy efficiency progress. But we must make it more equitable and ensure that it no longer subsidizes new fossil fuel appliances. The new Roadmap climate law requires the MassSave program to directly address emissions reductions in the interest of achieving net zero by 2050 and to equitably deliver energy efficiency and electrification. The draft plan fails these and other requirements. I urge you to exert all available means to ensure that a revised plan is produced that meets the following criteria:

Thank you for your dedication and commitment to climate and energy justice!

Sincerely,

Frona Vicksell

Dear Massachusetts Energy Efficiency Advisory Council,

The MassSave program has helped put Massachusetts at the top of the nation in energy efficiency progress. But we must make it more equitable and ensure that it no longer subsidizes new fossil fuel appliances. The new Roadmap climate law requires the MassSave program to directly address emissions reductions in the interest of achieving net zero by 2050 and to equitably deliver energy efficiency and electrification. The draft plan fails these and other requirements. I urge you to exert all available means to ensure that a revised plan is produced that meets the following criteria:

1. The plan must be an energy justice plan, and center equitable delivery of and access to efficiency programs. Adopt the Equity Working Group's recommendations for the program.
2. To meet our State's mandated emissions reductions targets, this program must prioritize equity and electrification over fossil fuel reliance - stop subsidizing new fossil fuel appliances and heating systems now.
3. In order to understand if the plan meets energy justice mandates, it must require transparent reporting of the demographics of residents served by the program. This reporting should include achievable numeric goals to reach those previously underserved by the program, resources to support those goals, and accountability measures for ensuring they are met.

Thank you for your dedication and commitment to climate and energy justice!

Sincerely,

Camille M Madden

Dear Massachusetts Energy Efficiency Advisory Council,

The evidence of climate change is abundantly clear and the effects are being seen and felt now. Brookline, where I live, is already affected by extreme heat, rain, snow and flooding. This will continue and get worse. We need to take real steps now to stop fossil fuel consumption from utility usage if we have any hope of mitigating the impact of climate change. Thank you for your support of a robust plan for MassSave.

The MassSave program has helped put Massachusetts at the top of the nation in energy efficiency progress. But we must make it more equitable and ensure that it no longer subsidizes new fossil fuel appliances. The new Roadmap climate law requires the MassSave program to directly address emissions reductions in the interest of achieving net zero by 2050 and to equitably deliver energy efficiency and electrification. The draft plan fails these and other requirements. I urge you to exert all available means to ensure that a revised plan is produced that meets the following criteria:

1. The plan must be an energy justice plan, and center equitable delivery of and access to efficiency programs. Adopt the Equity Working Group's recommendations for the program.
2. To meet our State's mandated emissions reductions targets, this program must prioritize equity and electrification over fossil fuel reliance - stop subsidizing new fossil fuel appliances and heating systems now.
3. In order to understand if the plan meets energy justice mandates, it must require transparent reporting of the demographics of residents served by the program. This reporting should include achievable numeric goals to reach those previously underserved by the program, resources to support those goals, and accountability measures for ensuring they are met.

Thank you for your dedication and commitment to climate and energy justice!

Sincerely,

John Spiers

Dear Massachusetts Energy Efficiency Advisory Council,

The MassSave program has helped put Massachusetts at the top of the nation in energy efficiency progress. But we must make it more equitable and ensure that it no longer subsidizes new fossil fuel appliances. The new Roadmap climate law requires the MassSave program to directly address emissions reductions in the interest of achieving net zero by 2050 and to equitably deliver energy efficiency and electrification. The draft plan fails these and other requirements. I urge you to exert all available means to ensure that a revised plan is produced that meets the following criteria:

1. The plan must be an energy justice plan, and center equitable delivery of and access to efficiency programs. Adopt the Equity Working Group's recommendations for the program.
2. To meet our State's mandated emissions reductions targets, this program must prioritize equity and electrification over fossil fuel reliance - stop subsidizing new fossil fuel appliances and heating systems now.
3. In order to understand if the plan meets energy justice mandates, it must require transparent reporting of the demographics of residents served by the program. This reporting should include achievable numeric goals to reach those previously underserved by the program, resources to support those goals, and accountability measures for ensuring they are met.

Thank you for your dedication and commitment to climate and energy justice!

Sincerely,

Nina Gross

Dear Massachusetts Energy Efficiency Advisory Council,

The MassSave program has helped put Massachusetts at the top of the nation in energy efficiency progress. But we must make it more equitable and ensure that it no longer subsidizes new fossil fuel appliances. The new Roadmap climate law requires the MassSave program to directly address emissions reductions in the interest of achieving net zero by 2050 and to equitably deliver energy efficiency and electrification. The draft plan fails these and other requirements. I urge you to exert all available means to ensure that a revised plan is produced that meets the following criteria:

1. The plan must be an energy justice plan, and center equitable delivery of and access to efficiency programs. Adopt the Equity Working Group's recommendations for the program.
2. To meet our State's mandated emissions reductions targets, this program must prioritize equity and electrification over fossil fuel reliance - stop subsidizing new fossil fuel appliances and heating systems now.
3. In order to understand if the plan meets energy justice mandates, it must require transparent reporting of the demographics of residents served by the program. This reporting should include achievable numeric goals to reach those previously underserved by the program, resources to support those goals, and accountability measures for ensuring they are met.

Thank you for your dedication and commitment to climate and energy justice!

Sincerely,

Geri Williams

Dear Massachusetts Energy Efficiency Advisory Council,

The MassSave program has helped put Massachusetts at the top of the nation in energy efficiency progress. But we must make it more equitable and ensure that it no longer subsidizes new fossil fuel appliances. The new Roadmap climate law requires the MassSave program to directly address emissions reductions in the interest of achieving net zero by 2050 and to equitably deliver energy efficiency and electrification. The draft plan fails these and other requirements. I urge you to exert all available means to ensure that a revised plan is produced that meets the following criteria:

1. The plan must be an energy justice plan, and center equitable delivery of and access to efficiency programs. Adopt the Equity Working Group's recommendations for the program.
2. To meet our State's mandated emissions reductions targets, this program must prioritize equity and electrification over fossil fuel reliance - stop subsidizing new fossil fuel appliances and heating systems now.
3. In order to understand if the plan meets energy justice mandates, it must require transparent reporting of the demographics of residents served by the program. This reporting should include achievable numeric goals to reach those previously underserved by the program, resources to support those goals, and accountability measures for ensuring they are met.

Thank you for your dedication and commitment to climate and energy justice!

Sincerely,

Ana-Paula Fernandes

Dear Massachusetts Energy Efficiency Advisory Council,

The MassSave program has helped put Massachusetts at the top of the nation in energy efficiency progress. But we must make it more equitable and ensure that it no longer subsidizes new fossil fuel appliances. The new Roadmap climate law requires the MassSave program to directly address emissions reductions in the interest of achieving net zero by 2050 and to equitably deliver energy efficiency and electrification. 2. To meet our State's mandated emissions reductions targets, this program must prioritize equity and electrification over fossil fuel reliance - stop subsidizing new fossil fuel appliances and heating systems now.
3. In order to understand if the plan meets energy justice mandates, it must require transparent reporting of the demographics of residents served by the program. This reporting should include achievable numeric goals to reach those previously underserved by the program, resources to support those goals, and accountability measures for ensuring they are met.

Thank you for your dedication and commitment to climate and energy justice!

Sincerely,

Bridget Lee

Dear Massachusetts Energy Efficiency Advisory Council,

The MassSave program has helped put Massachusetts at the top of the nation in energy efficiency progress. But we must make it more equitable and ensure that it no longer subsidizes new fossil fuel appliances. The new Roadmap climate law requires the MassSave program to directly address emissions reductions in the interest of achieving net zero by 2050 and to equitably deliver energy efficiency and electrification. The draft plan fails these and other requirements. I urge you to exert all available means to ensure that a revised plan is produced that meets the following criteria:

1. The plan must be an energy justice plan, and center equitable delivery of and access to efficiency programs. Adopt the Equity Working Group's recommendations for the program.
2. To meet our State's mandated emissions reductions targets, this program must prioritize equity and electrification over fossil fuel reliance - stop subsidizing new fossil fuel appliances and heating systems now.
3. In order to understand if the plan meets energy justice mandates, it must require transparent reporting of the demographics of residents served by the program. This reporting should include achievable numeric goals to reach those previously underserved by the program, resources to support those goals, and accountability measures for ensuring they are met.

Thank you for your dedication and commitment to climate and energy justice!

Sincerely,

Dennis Rogers
