

Dear Massachusetts Energy Efficiency Advisory Council,

The MassSave program has helped put Massachusetts at the top of the nation in energy efficiency progress. But we must make it more equitable and ensure that it no longer subsidizes new fossil fuel appliances. The new Roadmap climate law requires the MassSave program to directly address emissions reductions in the interest of achieving net zero by 2050 and to equitably deliver energy efficiency and electrification. The draft plan fails these and other requirements. I urge you to exert all available means to ensure that a revised plan is produced that meets the following criteria:

1. The plan must be an energy justice plan, and center equitable delivery of and access to efficiency programs. Adopt the Equity Working Group's recommendations for the program.
2. To meet our State's mandated emissions reductions targets, this program must prioritize equity and electrification over fossil fuel reliance - stop subsidizing new fossil fuel appliances and heating systems now.
3. In order to understand if the plan meets energy justice mandates, it must require transparent reporting of the demographics of residents served by the program. This reporting should include achievable numeric goals to reach those previously underserved by the program, resources to support those goals, and accountability measures for ensuring they are met.

Thank you for your dedication and commitment to climate and energy justice!

Sincerely,

Alycia Quick

Dear Massachusetts Energy Efficiency Advisory Council,

The MassSave program has helped put Massachusetts at the top of the nation in energy efficiency progress. But we must make it more equitable and ensure that it no longer subsidizes new fossil fuel appliances. The new Roadmap climate law requires the MassSave program to directly address emissions reductions in the interest of achieving net zero by 2050 and to equitably deliver energy efficiency and electrification. The draft plan fails these and other requirements. I urge you to exert all available means to ensure that a revised plan is produced that meets the following criteria:

Thank you for your dedication and commitment to climate and energy justice!

Sincerely,

nancy sarro

Dear Massachusetts Energy Efficiency Advisory Council,

It is time to be getting off not only oil, but natural gas systems. Please support rebate structures that will accelerate this transition. Unvented natural gas stoves are also a significant public health hazard, especially for children and the elderly.

Details at [rmi.org](http://rmi.org). Thank you!

The MassSave program has helped put Massachusetts at the top of the nation in energy efficiency progress. 2. To meet our State's mandated emissions reductions targets, this program must prioritize equity and electrification over fossil fuel reliance - stop subsidizing new fossil fuel appliances and heating systems now.
3. In order to understand if the plan meets energy justice mandates, it must require transparent reporting of the demographics of residents served by the program. This reporting should include achievable numeric goals to reach those previously underserved by the program, resources to support those goals, and accountability measures for ensuring they are met.

Thank you for your dedication and commitment to climate and energy justice!

Sincerely,

Susan Seaquist

Dear Massachusetts Energy Efficiency Advisory Council,

As a faith leader deeply engaged in the work of environmental justice and slowing climate change, I am alarmed by both the failure of the proposed plan to adequately address equity, as well as its intent to continue to give higher subsidies for converting to gas-fired energy than to clean electrification. We are in a climate emergency and must end subsidies for fossil fuel conversions. That money should be used instead to subsidize the higher electric bills of low income people until the cost of electricity comes down as clean sources go up.

The MassSave program has helped put Massachusetts at the top of the nation in energy efficiency progress. But we must make it more equitable and ensure that it no longer subsidizes new fossil fuel appliances. The new Roadmap climate law requires the MassSave program to directly address emissions reductions in the interest of achieving net zero by 2050 and to equitably deliver energy efficiency and electrification. The draft plan fails these and other requirements. I urge you to exert all available means to ensure that a revised plan is produced that meets the following criteria:

1. The plan must be an energy justice plan, and center equitable delivery of and access to efficiency programs. Adopt the Equity Working Group's recommendations for the program.
2. To meet our State's mandated emissions reductions targets, this program must prioritize equity and electrification over fossil fuel reliance - stop subsidizing new fossil fuel appliances and heating systems now.
3. In order to understand if the plan meets energy justice mandates, it must require transparent reporting of the demographics of residents served by the program. This reporting should include achievable numeric goals to reach those previously underserved by the program, resources to support those goals, and accountability measures for ensuring they are met.

Thank you for your dedication and commitment to climate and energy justice!

Sincerely,

Betsy Sowers

Dear Massachusetts Energy Efficiency Advisory Council,

STOP Subsidies for new fossil fuel appliances and heating systems! Time is of the essence, we need equity AND the most efficient non-fossil fuel dependent appliances and heat/cooling systems. Thank you.

The MassSave program has helped put Massachusetts at the top of the nation in energy efficiency progress. But we must make it more equitable and ensure that it no longer subsidizes new fossil fuel appliances. The new Roadmap climate law requires the MassSave program to directly address emissions reductions in the interest of achieving net zero by 2050 and to equitably deliver energy efficiency and electrification. The draft plan fails these and other requirements. I urge you to exert all available means to ensure that a revised plan is produced that meets the following criteria:

1. The plan must be an energy justice plan, and center equitable delivery of and access to efficiency programs. Adopt the Equity Working Group's recommendations for the program.
2. To meet our State's mandated emissions reductions targets, this program must prioritize equity and electrification over fossil fuel reliance - stop subsidizing new fossil fuel appliances and heating systems now.
3. In order to understand if the plan meets energy justice mandates, it must require transparent reporting of the demographics of residents served by the program. This reporting should include achievable numeric goals to reach those previously underserved by the program, resources to support those goals, and accountability measures for ensuring they are met.

Thank you for your dedication and commitment to climate and energy justice!

Sincerely,

Catherine LeBlanc

Dear Massachusetts Energy Efficiency Advisory Council,

I have benefited myself from the MASS Save program and want to make sure that everyone else in Massachusetts can benefit as well. We also need to stop relying on fossil fuels if we are to survive as a species on this planet.

The MassSave program has helped put Massachusetts at the top of the nation in energy efficiency progress. But we must make it more equitable and ensure that it no longer subsidizes new fossil fuel appliances. The new Roadmap climate law requires the MassSave program to directly address emissions reductions in the interest of achieving net zero by 2050 and to equitably deliver energy efficiency and electrification. The draft plan fails these and other requirements. I urge you to exert all available means to ensure that a revised plan is produced that meets the following criteria:

1. The plan must be an energy justice plan, and center equitable delivery of and access to efficiency programs. Adopt the Equity Working Group's recommendations for the program.
2. To meet our State's mandated emissions reductions targets, this program must prioritize equity and electrification over fossil fuel reliance - stop subsidizing new fossil fuel appliances and heating systems now.
3. In order to understand if the plan meets energy justice mandates, it must require transparent reporting of the demographics of residents served by the program. This reporting should include achievable numeric goals to reach those previously underserved by the program, resources to support those goals, and accountability measures for ensuring they are met.

Thank you for your dedication and commitment to climate and energy justice!

Sincerely,

Suzanne Mrozak

Dear Massachusetts Energy Efficiency Advisory Council,

The science is clear: we can no longer continue to burn fossil fuels and have a livable climate. We can no longer subsidize fossil fuels for heating. Our children deserve nothing less than a livable climate.

The MassSave program has helped put Massachusetts at the top of the nation in energy efficiency progress. But we must make it more equitable and ensure that it no longer subsidizes new fossil fuel appliances. The new Roadmap climate law requires the MassSave program to directly address emissions reductions in the interest of achieving net zero by 2050 and to equitably deliver energy efficiency and electrification. The draft plan fails these and other requirements. I urge you to exert all available means to ensure that a revised plan is produced that meets the following criteria:

1. The plan must be an energy justice plan, and center equitable delivery of and access to efficiency programs. Adopt the Equity Working Group's recommendations for the program.
2. To meet our State's mandated emissions reductions targets, this program must prioritize equity and electrification over fossil fuel reliance - stop subsidizing new fossil fuel appliances and heating systems now.
3. In order to understand if the plan meets energy justice mandates, it must require transparent reporting of the demographics of residents served by the program. This reporting should include achievable numeric goals to reach those previously underserved by the program, resources to support those goals, and accountability measures for ensuring they are met.

Thank you for your dedication and commitment to climate and energy justice!

Sincerely,

Andee Krasner

Dear Massachusetts Energy Efficiency Advisory Council,

I live in the Merrimack Valley. The gas disaster was the perfect opportunity to pivot those affected from fossil fuels. I was sorely disappointed. Mass Save is one of the best tools we have to help us transition to renewable energy. We need heat pumps and induction stoves. And we need to start with those that can least afford it. Our world is heating up and you have the power to do something about it. Give it everything you've got. We need you !!

The MassSave program has helped put Massachusetts at the top of the nation in energy efficiency progress. But we must make it more equitable and ensure that it no longer subsidizes new fossil fuel appliances. The new Roadmap climate law requires the MassSave program to directly address emissions reductions in the interest of achieving net zero by 2050 and to equitably deliver energy efficiency and electrification. The draft plan fails these and other requirements. I urge you to exert all available means to ensure that a revised plan is produced that meets the following criteria:

1. The plan must be an energy justice plan, and center equitable delivery of and access to efficiency programs. Adopt the Equity Working Group's recommendations for the program.
2. To meet our State's mandated emissions reductions targets, this program must prioritize equity and electrification over fossil fuel reliance - stop subsidizing new fossil fuel appliances and heating systems now.
3. In order to understand if the plan meets energy justice mandates, it must require transparent reporting of the demographics of residents served by the program. This reporting should include achievable numeric goals to reach those previously underserved by the program, resources to support those goals, and accountability measures for ensuring they are met.

Thank you for your dedication and commitment to climate and energy justice!

Sincerely,

Lynn Langton

Dear Massachusetts Energy Efficiency Advisory Council,

The MassSave program has helped put Massachusetts at the top of the nation in energy efficiency progress. But we must make it more equitable and ensure that it no longer subsidizes new fossil fuel appliances. The new Roadmap climate law requires the MassSave program to directly address emissions reductions in the interest of achieving net zero by 2050 and to equitably deliver energy efficiency and electrification. Thank you for your dedication and commitment to climate and energy justice!

Sincerely,

Jane Moosbruker

Dear Massachusetts Energy Efficiency Advisory Council,

In order to make sure that Mass residents who are in most need are served and to ensure the widest adoption possible, we must look at this bill from an equity lens. Please include the Equity group's recommendations so MassSave can be as effective as possible to make real change in our current climate crisis. Thank you!

The MassSave program has helped put Massachusetts at the top of the nation in energy efficiency progress. But we must make it more equitable and ensure that it no longer subsidizes new fossil fuel appliances. The new Roadmap climate law requires the MassSave program to directly address emissions reductions in the interest of achieving net zero by 2050 and to equitably deliver energy efficiency and electrification. The draft plan fails these and other requirements. I urge you to exert all available means to ensure that a revised plan is produced that meets the following criteria:

1. The plan must be an energy justice plan, and center equitable delivery of and access to efficiency programs. Adopt the Equity Working Group's recommendations for the program.
2. To meet our State's mandated emissions reductions targets, this program must prioritize equity and electrification over fossil fuel reliance - stop subsidizing new fossil fuel appliances and heating systems now.
3. In order to understand if the plan meets energy justice mandates, it must require transparent reporting of the demographics of residents served by the program. This reporting should include achievable numeric goals to reach those previously underserved by the program, resources to support those goals, and accountability measures for ensuring they are met.

Thank you for your dedication and commitment to climate and energy justice!

Sincerely,

Hannah Greaves

Dear Massachusetts Energy Efficiency Advisory Council,

The MassSave program has helped put Massachusetts at the top of the nation in energy efficiency progress. But we must make it more equitable and ensure that it no longer subsidizes new fossil fuel appliances. The new Roadmap climate law requires the MassSave program to directly address emissions reductions in the interest of achieving net zero by 2050 and to equitably deliver energy efficiency and electrification. The draft plan fails these and other requirements. I urge you to exert all available means to ensure that a revised plan is produced that meets the following criteria:

1. The plan must be an energy justice plan, and center equitable delivery of and access to efficiency programs. Adopt the Equity Working Group's recommendations for the program.
2. To meet our State's mandated emissions reductions targets, this program must prioritize equity and electrification over fossil fuel reliance - stop subsidizing new fossil fuel appliances and heating systems now.
3. In order to understand if the plan meets energy justice mandates, it must require transparent reporting of the demographics of residents served by the program. This reporting should include achievable numeric goals to reach those previously underserved by the program, resources to support those goals, and accountability measures for ensuring they are met.

Thank you for your dedication and commitment to climate and energy justice!

Sincerely,

Molly Walsh

Dear Massachusetts Energy Efficiency Advisory Council,

MassSave is the only source of energy reduction education and actions for many residents of Massachusetts - we must ensure that going forward it supports the goals of the state by removing subsidies for natural gas and ensuring that all residents, especially those most impacted by climate change, are assisted.

The MassSave program has helped put Massachusetts at the top of the nation in energy efficiency progress. But we must make it more equitable and ensure that it no longer subsidizes new fossil fuel appliances. The new Roadmap climate law requires the MassSave program to directly address emissions reductions in the interest of achieving net zero by 2050 and to equitably deliver energy efficiency and electrification. The draft plan fails these and other requirements. I urge you to exert all available means to ensure that a revised plan is produced that meets the following criteria:

1. The plan must be an energy justice plan, and center equitable delivery of and access to efficiency programs. Adopt the Equity Working Group's recommendations for the program.
2. To meet our State's mandated emissions reductions targets, this program must prioritize equity and electrification over fossil fuel reliance - stop subsidizing new fossil fuel appliances and heating systems now.
3. In order to understand if the plan meets energy justice mandates, it must require transparent reporting of the demographics of residents served by the program. This reporting should include achievable numeric goals to reach those previously underserved by the program, resources to support those goals, and accountability measures for ensuring they are met.

Thank you for your dedication and commitment to climate and energy justice!

Sincerely,

Mallorie Barber

Dear Massachusetts Energy Efficiency Advisory Council,

The MassSave program has helped put Massachusetts at the top of the nation in energy efficiency progress. But we must make it more equitable and ensure that it no longer subsidizes new fossil fuel appliances. The new Roadmap climate law requires the MassSave program to directly address emissions reductions in the interest of achieving net zero by 2050 and to equitably deliver energy efficiency and electrification. The draft plan fails these and other requirements. I urge you to exert all available means to ensure that a revised plan is produced that meets the following criteria:

1. The plan must be an energy justice plan, and center equitable delivery of and access to efficiency programs. Adopt the Equity Working Group's recommendations for the program.
2. To meet our State's mandated emissions reductions targets, this program must prioritize equity and electrification over fossil fuel reliance - stop subsidizing new fossil fuel appliances and heating systems now.
3. In order to understand if the plan meets energy justice mandates, it must require transparent reporting of the demographics of residents served by the program. This reporting should include achievable numeric goals to reach those previously underserved by the program, resources to support those goals, and accountability measures for ensuring they are met.

Thank you for your dedication and commitment to climate and energy justice!

Sincerely,

Laurie Toner

Dear Massachusetts Energy Efficiency Advisory Council,

The MassSave program has helped put Massachusetts at the top of the nation in energy efficiency progress. But we must make it more equitable and ensure that it no longer subsidizes new fossil fuel appliances. The new Roadmap climate law requires the MassSave program to directly address emissions reductions in the interest of achieving net zero by 2050 and to equitably deliver energy efficiency and electrification. The draft plan fails these and other requirements. I urge you to exert all available means to ensure that a revised plan is produced that meets the following criteria:

1. The plan must be an energy justice plan, and center equitable delivery of and access to efficiency programs. Adopt the Equity Working Group's recommendations for the program.
2. To meet our State's mandated emissions reductions targets, this program must prioritize equity and electrification over fossil fuel reliance - stop subsidizing new fossil fuel appliances and heating systems now.

Thank you for your dedication and commitment to climate and energy justice!

Sincerely,

Pamela Maxfield

Dear Massachusetts Energy Efficiency Advisory Council,

It's unbelievable that I, as a consumer, have to push against fossil fuel interests to help ensure that MassSave does the right thing for ALL the energy consumers in Massachusetts. The emissions reductions clock is ticking. MassSave must do better by offering energy-savings programs to more consumers.

The MassSave program has helped put Massachusetts at the top of the nation in energy efficiency progress. But we must make it more equitable and ensure that it no longer subsidizes new fossil fuel appliances. The new Roadmap climate law requires the MassSave program to directly address emissions reductions in the interest of achieving net zero by 2050 and to equitably deliver energy efficiency and electrification. The draft plan fails these and other requirements. I urge you to exert all available means to ensure that a revised plan is produced that meets the following criteria:

1. The plan must be an energy justice plan, and center equitable delivery of and access to efficiency programs. Adopt the Equity Working Group's recommendations for the program.

Thank you for your dedication and commitment to climate and energy justice!

Sincerely,

Diane LeDuc

Dear Massachusetts Energy Efficiency Advisory Council,

I live in Boston. Several years ago I had a MassSave audit that began with the auditor saying "I hate old houses" and the houses in my neighborhood are too close together. Not helpful. MassSave has to be more equitable, sensitive to language and cultural differences, and focused on reducing carbon emissions.

The MassSave program has helped put Massachusetts at the top of the nation in energy efficiency progress. But we must make it more equitable and ensure that it no longer subsidizes new fossil fuel appliances. The new Roadmap climate law requires the MassSave program to directly address emissions reductions in the interest of achieving net zero by 2050 and to equitably deliver energy efficiency and electrification. The draft plan fails these and other requirements. I urge you to exert all available means to ensure that a revised plan is produced that meets the following criteria:

1. The plan must be an energy justice plan, and center equitable delivery of and access to efficiency programs. Adopt the Equity Working Group's recommendations for the program.
2. To meet our State's mandated emissions reductions targets, this program must prioritize equity and electrification over fossil fuel reliance - stop subsidizing new fossil fuel appliances and heating systems now.
3. In order to understand if the plan meets energy justice mandates, it must require transparent reporting of the demographics of residents served by the program. This reporting should include achievable numeric goals to reach those previously underserved by the program, resources to support those goals, and accountability measures for ensuring they are met.

Thank you for your dedication and commitment to climate and energy justice!

Sincerely,

Carol Boggs

Dear Massachusetts Energy Efficiency Advisory Council,

The MassSave program has helped put Massachusetts at the top of the nation in energy efficiency progress. But we must make it more equitable and ensure that it no longer subsidizes new fossil fuel appliances. The new Roadmap climate law requires the MassSave program to directly address emissions reductions in the interest of achieving net zero by 2050 and to equitably deliver energy efficiency and electrification. Thank you for your dedication and commitment to climate and energy justice!

Sincerely,

J. David Reno

Dear Massachusetts Energy Efficiency Advisory Council,

Reducing dependence on fossil fuels is critical to environmental conservation. Subsidizing improvements in energy efficiency for all dwellings is vital to this goal, and must be available to all home owners and renters.

The MassSave program has helped put Massachusetts at the top of the nation in energy efficiency progress. But we must make it more equitable and ensure that it no longer subsidizes new fossil fuel appliances. The new Roadmap climate law requires the MassSave program to directly address emissions reductions in the interest of achieving net zero by 2050 and to equitably deliver energy efficiency and electrification. The draft plan fails these and other requirements. I urge you to exert all available means to ensure that a revised plan is produced that meets the following criteria:

1. The plan must be an energy justice plan, and center equitable delivery of and access to efficiency programs. Adopt the Equity Working Group's recommendations for the program.
2. To meet our State's mandated emissions reductions targets, this program must prioritize equity and electrification over fossil fuel reliance - stop subsidizing new fossil fuel appliances and heating systems now.
3. In order to understand if the plan meets energy justice mandates, it must require transparent reporting of the demographics of residents served by the program. This reporting should include achievable numeric goals to reach those previously underserved by the program, resources to support those goals, and accountability measures for ensuring they are met.

Thank you for your dedication and commitment to climate and energy justice!

Sincerely,

Allison Hague

Dear Massachusetts Energy Efficiency Advisory Council,

Equity, efficiency and electrification are important - please consider these recommendations

The MassSave program has helped put Massachusetts at the top of the nation in energy efficiency progress. But we must make it more equitable and ensure that it no longer subsidizes new fossil fuel appliances. The new Roadmap climate law requires the MassSave program to directly address emissions reductions in the interest of achieving net zero by 2050 and to equitably deliver energy efficiency and electrification. The draft plan fails these and other requirements. I urge you to exert all available means to ensure that a revised plan is produced that meets the following criteria:

1. The plan must be an energy justice plan, and center equitable delivery of and access to efficiency programs. Adopt the Equity Working Group's recommendations for the program.
2. To meet our State's mandated emissions reductions targets, this program must prioritize equity and electrification over fossil fuel reliance - stop subsidizing new fossil fuel appliances and heating systems now.
3. In order to understand if the plan meets energy justice mandates, it must require transparent reporting of the demographics of residents served by the program. This reporting should include achievable numeric goals to reach those previously underserved by the program, resources to support those goals, and accountability measures for ensuring they are met.

Thank you for your dedication and commitment to climate and energy justice!

Sincerely,

Rob Fitzgibbon

Dear Massachusetts Energy Efficiency Advisory Council,

The MassSave program has helped put Massachusetts at the top of the nation in energy efficiency progress. But we must make it more equitable and ensure that it no longer subsidizes new fossil fuel appliances. The new Roadmap climate law requires the MassSave program to directly address emissions reductions in the interest of achieving net zero by 2050 and to equitably deliver energy efficiency and electrification. The draft plan fails these and other requirements. I urge you to exert all available means to ensure that a revised plan is produced that meets the following criteria:

1. The plan must be an energy justice plan, and center equitable delivery of and access to efficiency programs. Adopt the Equity Working Group's recommendations for the program.
2. To meet our State's mandated emissions reductions targets, this program must prioritize equity and electrification over fossil fuel reliance - stop subsidizing new fossil fuel appliances and heating systems now.
3. In order to understand if the plan meets energy justice mandates, it must require transparent reporting of the demographics of residents served by the program. This reporting should include achievable numeric goals to reach those previously underserved by the program, resources to support those goals, and accountability measures for ensuring they are met.

Thank you for your dedication and commitment to climate and energy justice!

Sincerely,

Esther Wolk

Dear Massachusetts Energy Efficiency Advisory Council,

The MassSave program has helped put Massachusetts at the top of the nation in energy efficiency progress. But we must make it more equitable and ensure that it no longer subsidizes new fossil fuel appliances. The new Roadmap climate law requires the MassSave program to directly address emissions reductions in the interest of achieving net zero by 2050 and to equitably deliver energy efficiency and electrification. The draft plan fails these and other requirements. I urge you to exert all available means to ensure that a revised plan is produced that meets the following criteria:

1. The plan must be an energy justice plan, and center equitable delivery of and access to efficiency programs. Adopt the Equity Working Group's recommendations for the program.
2. To meet our State's mandated emissions reductions targets, this program must prioritize equity and electrification over fossil fuel reliance - stop subsidizing new fossil fuel appliances and heating systems now.
3. In order to understand if the plan meets energy justice mandates, it must require transparent reporting of the demographics of residents served by the program. This reporting should include achievable numeric goals to reach those previously underserved by the program, resources to support those goals, and accountability measures for ensuring they are met.

Thank you for your dedication and commitment to climate and energy justice!

Sincerely,

Kale Connerty

Dear Massachusetts Energy Efficiency Advisory Council,

We must 1) REDUCE  
2) ELECTRIFY  
3) DECARBONIZE

NOW!

All people must reduce their energy consumption, especially the rich people with no conscience about excess.

The poor people need efficient, carbon free heat, air conditioning and public transportation NOW.

Methane is exploding from the Arctic and from Siberia. CO2 is at 415ppm. If we do not act NOW it will be too late.

Sue Butler RN, MSN, PhD

The MassSave program has helped put Massachusetts at the top of the nation in energy efficiency progress. But we must make it more equitable and ensure that it no longer subsidizes new fossil fuel appliances. The new Roadmap climate law requires the MassSave program to directly address emissions reductions in the interest of achieving net zero by 2050 and to equitably deliver energy efficiency and electrification. The draft plan fails these and other requirements. I urge you to exert all available means to ensure that a revised plan is produced that meets the following criteria:

1. The plan must be an energy justice plan, and center equitable delivery of and access to efficiency programs. Adopt the Equity Working Group's recommendations for the program.
2. To meet our State's mandated emissions reductions targets, this program must prioritize equity and electrification over fossil fuel reliance - stop subsidizing new fossil fuel appliances and heating systems now.
3. In order to understand if the plan meets energy justice mandates, it must require transparent reporting of the demographics of residents served by the program. This reporting should include achievable numeric goals to reach those previously underserved by the program, resources to support those goals, and accountability measures for ensuring they are met.

Thank you for your dedication and commitment to climate and energy justice!

Sincerely,

Sue Butler

Dear Massachusetts Energy Efficiency Advisory Council,

While I'm proud of how much Massachusetts leads on climate issues, there is always more to do and ensuring equity is vitally important. I am afraid that the future won't be livable, and am gravely concerned about the problems already here that most affect the most vulnerable populations.

The MassSave program has helped put Massachusetts at the top of the nation in energy efficiency progress. But we must make it more equitable and ensure that it no longer subsidizes new fossil fuel appliances. The new Roadmap climate law requires the MassSave program to directly address emissions reductions in the interest of achieving net zero by 2050 and to equitably deliver energy efficiency and electrification. The draft plan fails these and other requirements. I urge you to exert all available means to ensure that a revised plan is produced that meets the following criteria:

1. The plan must be an energy justice plan, and center equitable delivery of and access to efficiency programs. Adopt the Equity Working Group's recommendations for the program.
2. To meet our State's mandated emissions reductions targets, this program must prioritize equity and electrification over fossil fuel reliance - stop subsidizing new fossil fuel appliances and heating systems now.
3. In order to understand if the plan meets energy justice mandates, it must require transparent reporting of the demographics of residents served by the program. This reporting should include achievable numeric goals to reach those previously underserved by the program, resources to support those goals, and accountability measures for ensuring they are met.

Thank you for your dedication and commitment to climate and energy justice!

Sincerely,

Deanna Hartsook

Dear Massachusetts Energy Efficiency Advisory Council,

The MassSave program has helped put Massachusetts at the top of the nation in energy efficiency progress. But we must make it more equitable and ensure that it no longer subsidizes new fossil fuel appliances. The new Roadmap climate law requires the MassSave program to directly address emissions reductions in the interest of achieving net zero by 2050 and to equitably deliver energy efficiency and electrification. Thank you for your dedication and commitment to climate and energy justice!

Sincerely,

Leslie Pearlman

Dear Massachusetts Energy Efficiency Advisory Council,

Any energy upgrade that perpetuates reliance on fossil fuels puts people at risk caused by the degrading leaky gas pipelines under our streets, the outdoor and indoor pollution from fossil fuel appliances, economic burdens from higher prices, and the missed opportunity of all the health and economic benefits that clean renewable energy provides.

The MassSave program has helped put Massachusetts at the top of the nation in energy efficiency progress. But we must make it more equitable and ensure that it no longer subsidizes new fossil fuel appliances. The new Roadmap climate law requires the MassSave program to directly address emissions reductions in the interest of achieving net zero by 2050 and to equitably deliver energy efficiency and electrification. The draft plan fails these and other requirements. I urge you to exert all available means to ensure that a revised plan is produced that meets the following criteria:

1. The plan must be an energy justice plan, and center equitable delivery of and access to efficiency programs. Adopt the Equity Working Group's recommendations for the program.

Thank you for your dedication and commitment to climate and energy justice!

Sincerely,

Peter and Ellen Rawlings

Dear Massachusetts Energy Efficiency Advisory Council,

We have to start now to save life as we know it on this planet.

The MassSave program has helped put Massachusetts at the top of the nation in energy efficiency progress. But we must make it more equitable and ensure that it no longer subsidizes new fossil fuel appliances. The new Roadmap climate law requires the MassSave program to directly address emissions reductions in the interest of achieving net zero by 2050 and to equitably deliver energy efficiency and electrification. The draft plan fails these and other requirements. I urge you to exert all available means to ensure that a revised plan is produced that meets the following criteria:

1. The plan must be an energy justice plan, and center equitable delivery of and access to efficiency programs. Adopt the Equity Working Group's recommendations for the program.
2. To meet our State's mandated emissions reductions targets, this program must prioritize equity and electrification over fossil fuel reliance - stop subsidizing new fossil fuel appliances and heating systems now.
3. In order to understand if the plan meets energy justice mandates, it must require transparent reporting of the demographics of residents served by the program. This reporting should include achievable numeric goals to reach those previously underserved by the program, resources to support those goals, and accountability measures for ensuring they are met.

Thank you for your dedication and commitment to climate and energy justice!

Sincerely,

Marsha Downing

Dear Massachusetts Energy Efficiency Advisory Council,

The MassSave program has helped put Massachusetts at the top of the nation in energy efficiency progress. But we must make it more equitable and ensure that it no longer subsidizes new fossil fuel appliances. The new Roadmap climate law requires the MassSave program to directly address emissions reductions in the interest of achieving net zero by 2050 and to equitably deliver energy efficiency and electrification. The draft plan fails these and other requirements. I urge you to exert all available means to ensure that a revised plan is produced that meets the following criteria:

1. The plan must be an energy justice plan, and center equitable delivery of and access to efficiency programs. Adopt the Equity Working Group's recommendations for the program.
2. To meet our State's mandated emissions reductions targets, this program must prioritize equity and electrification over fossil fuel reliance - stop subsidizing new fossil fuel appliances and heating systems now.
3. In order to understand if the plan meets energy justice mandates, it must require transparent reporting of the demographics of residents served by the program. This reporting should include achievable numeric goals to reach those previously underserved by the program, resources to support those goals, and accountability measures for ensuring they are met.

Thank you for your dedication and commitment to climate and energy justice!

Sincerely,

Dorothy Anderson

Dear Massachusetts Energy Efficiency Advisory Council,

The MassSave program has helped put Massachusetts at the top of the nation in energy efficiency progress. But we must make it more equitable and ensure that it no longer subsidizes new fossil fuel appliances. The new Roadmap climate law requires the MassSave program to directly address emissions reductions in the interest of achieving net zero by 2050 and to equitably deliver energy efficiency and electrification. Sarah Koolsbergen

Dear Massachusetts Energy Efficiency Advisory Council,

Sustainable energy must be accessible to everyone. This is not an issue that only affects some people; the need for safe and renewable energy affects all Massachusetts residents. Please ensure that the MassSave plan for 2022-2024 recognizes and specifically addresses issues of justice and inequality in the effort to move Massachusetts to a better, greener energy future.

The MassSave program has helped put Massachusetts at the top of the nation in energy efficiency progress. But we must make it more equitable and ensure that it no longer subsidizes new fossil fuel appliances. The new Roadmap climate law requires the MassSave program to directly address emissions reductions in the interest of achieving net zero by 2050 and to equitably deliver energy efficiency and electrification.
