To Whom It May Concern:

I am writing to express my interest in serving on the Energy Efficiency Advisory Council's Equity Working Group. As a member of the Green Justice Coalition (GJC) steering committee and labor leader at International Brotherhood of Electrical Workers Local 103 (IBEW 103), I will bring a strong commitment to expanding equitable access and participation in energy efficiency programs among underserved customers.

GJC is a partnership of community-based membership organizations and labor groups, growing the power of working-class people and people of color in the Greater Boston area and beyond. We have a long history of advocating for equitable energy efficiency and a just transition, working to ensure that Massachusetts energy policy benefits all of us, regardless of background or identity.

I am a Master Electrician, Business Agent for IBEW Local 103, and a dedicated advocate for workforce development and career pathways in the skilled trades. I would bring to the EWG my unique perspective that combines frontline industry experience, labor leadership, workforce development, regulatory oversight, and community engagement. In addition to my industry leadership, I serve as National Treasurer of the Electrical Workers Minority Caucus (EWMC) and am actively involved in initiatives that expand access to careers in the trades for women, people of color, veterans, and other underrepresented populations. My work is rooted in the belief that a strong workforce depends on creating opportunities for individuals from all backgrounds to succeed. This starts at home---ensuring equitable and affordable access to energy services reduces energy burden and contributes to the economic and social well being necessary to survive and thrive in the Commonwealth.

My public service record includes my current role as Chair of the Massachusetts Board of State Examiners of Electricians, where I help uphold professional standards and protect public safety across the Commonwealth. I also serves as a Trustee for the Greater Boston JATC and Local 103 benefit funds, helping guide programs that support apprentice training, continuing education, and workforce development.

I would be honored to contribute to the EWG's important work of providing input and feedback to the EEAC, in carrying out its statutory responsibilities to advise Program Administrators on equitable Mass Save service and more.

Kind Regards,

Renee Dozier
