

Resolution Re Expenditures for Pilot Projects
Approved November 10, 2009

The Council acknowledges the petition of the Program Administrators regarding the expenditure of funds to conduct a number of pilots, as described in its petition. The Council finds that these pilot projects will provide information and insight that will inform future program opportunities. We anticipate that one or more pilots undertaken during 2010 may be able to continue in 2011 as standalone programs or integrated elements of existing programs. The Council therefore approves the expenditure of funds for the pilots proposed by the electric PAs for 2010 only and by the gas PAs for 2010 and 2011, anticipating further information about current and future pilots later in 2010.
