

Public Comment: EEAC

Steve Cowell

Director, Northeast Energy Efficiency and Electrification Council

5-17-2023

To the Council:

Federal Tax Credits and Incentives

I just wanted to add our voice to support the hard work that all parties to this challenge are working on. That is to dig into the details and make whatever additions or modifications are needed to the current program to best take advantage and incorporate the IRA tax credits as well as the Hope for Homes and HEERA incentives. DOER will need to pull together a state plan for implementation of the DOE funded IRA programs and the PA's; Contractors and DOER will need to make whatever changes to customer information is needed to incorporate the tax credits. Some of this will not be easy but to best help reach our excellent climate and efficiency goals, we should do whatever is needed to incorporate this new Federal funding. NEEEC is working on multiple fronts, including DOE to help achieve these goals and hope to have a good outcome over the next few months.
