

Dear Ms. McCarey:

I am a resident of New Salem, Massachusetts and am very concerned about our energy situation. I strongly encourage the Energy Efficiency Advisory Council to support energy efficiency programs. They are our most cost effective and research has shown this. Furthermore, the Green Communities Act and the Global Warming Solutions Act require this. If these efforts are made, there will be little need for a very costly pipeline expansion. Please help make these programs expand. I also believe they will help cut our outrageous electric bill increases. Thank you.

Sincerely,  
Trudy Berkovitz
