Home Energy Assessments

Discover ways to save energy in your home.

What is a Home Energy Assessment?

A Home Energy Assessment helps you find ways to save energy and reduce your climate impact. You'll learn how to use energy more efficiently and get a decarbonization roadmap for your home.

During an assessment, an Energy Specialist will inspect all areas of your home to evaluate how your home uses energy. They will then provide a personalized report with energy-saving recommendations, along with any associated rebates and services you may qualify for. You'll also receive resources for solar PV, battery storage, and electric vehicles.

What you get during a Home Energy Assessment:

- An **evaluation of your home** by a qualified Energy Specialist
- A custom Home Energy Report providing an **action plan to save energy** in your home and recommendations and opportunities for pursuing decarbonization of your home
- **Energy-saving products**, such as programmable thermostats and water saving devices
- Access to additional **Mass Save® rebates and incentives**

Did you know?

Home Energy Assessments are no cost to you. Approximately 75,000 homes in Massachusetts get a Home Energy Assessments each year.

What rebates and incentives might I qualify for?

- **75-100% off insulation upgrades**
- **No-cost air sealing**
- **Rebates up to $16,000 on high-efficiency heat pumps****
- **Rebates for high-efficiency appliances**
- **0% financing**
- **And more**

Myth Buster

Myth: Only homeowners can get a Home Energy Assessment.

Fact: All Massachusetts residents can get a Home Energy Assessment, including renters and landlords.

Did you know?

If you add up all the leaks, holes and gaps in an average home, the **air leakage is the equivalent of a window being open year-round.***

Common Air Leaks
